

Australia Together

A plan by Australians
for a better future
2020 to 2050

Australia Together

A plan for a better Australia by 2050

Australian Community Futures Planning

Issue No. 4

Draft – estimated 60% complete

December 2021

About Australian Community Futures Planning

ACFP was founded in March 2020 for the purpose of encouraging greater participation by Australians in planning their own future as a nation within a 21st century democracy. It is an independent centre of excellence in national community futures planning, providing an organising framework that can enable any and all Australians to increase the chances of improving our entire quality of life – our society, our environment, our economy and our governance.

Australian Community Futures Planning has no affiliation with any political party inside or outside Australia. It receives neither political party nor other funding. All output from ACFP is produced by in-kind contributions of volunteers.

From 2020 until at least 2023 ACFP will be in start-up phase, pursuing a range of alliances with willing Australians, including participants in local government, the progressive media, open-minded progressive activist community associations, relevant university institutions, specialist centres of excellence, think tanks, peak environmental groups, scientists, economists, Indigenous and human rights advocates, and statisticians.

ACFP's Founder is Dr Bronwyn Kelly. **Dr Kelly is the Principal** in the process of drafting this version of *Australia Together*.

Data and other commentary in this publication may not be reproduced without full attribution of ACFP and the Principal, Dr Bronwyn Kelly. All processes specified in this document, including but not limited to National Integrated Planning & Reporting and the Australia Together National Wellbeing Index, are proprietary to Australian Community Futures Planning and may not be reproduced or used for financial gain without the prior consent of ACFP's Founder Dr Bronwyn Kelly, except in the case of brief quotations embodied in critical articles or reviews. All such quotations must be attributed to the Principal, Dr Bronwyn Kelly.

Note – Disclaimer

Australia Together is a plan developed for the Australian community by any Australian willing to participate in good faith. It is not developed by any political party or elected government.

***Australia Together* has no statutory force
and binds neither governments nor participants in any way.**

Participation in the national community futures planning process for development of and reporting on ***Australia Together*** is entirely voluntary.

Acknowledgement

ACFP acknowledges the Traditional Owners of the lands on which we live and work across Australia and pays respect to Elders past, present and emerging. We acknowledge that sovereignty has never been ceded. ACFP recognises and celebrates the extraordinary contribution that Aboriginal and Torres Strait Islander peoples have made through millennia to all aspects of Australian life, culture and the environment. May all their songlines endure.

This Draft of *Australia Together* – Stage of Development

This is Issue No. 4 of the starting draft of *Australia Together*.

Issue No. 1 was released in May 2021. It contained over 180 Targets and Strategies for a better Australia by 2050. No amendments other than typographic corrections have been made to those Targets and Strategies, except in the case of the target for GDP growth in **Econ01.03** which has been amended from:

Growth in Gross Domestic Product (GDP) averages 3.1% per annum over rolling 3-year periods.

to

Growth in Gross Domestic Product (GDP) does not fall below 2.4% per annum measured over rolling 3-year periods.

A rationale for the target selected for growth in Gross Domestic Product (GDP) is provided in Note 15 below.

Issue Nos. 2 and 3 included an additional 38 Targets and Strategies. A small number of amendments have been made, mainly of a typographical nature.

Issue No. 4 includes 12 additional Targets and Strategies as follows:

Additional Targets, Indicators and Strategies in Issue No. 4 of <i>Australia Together</i>	
Econ02.04.02	Employment planning - Community engagement on introduction of a social wage
Econ03.01.02	Distribution of national wealth – corporations versus wage earners
Econ02.03.01	Permanence and casualisation of employment
Econ03.06.01	Perceptions of economic (class) mobility
Econ03.08	Perceptions of long term economic/financial prospects - Intergenerational financial security
Econ03.08.01	Perceptions of long term economic/financial prospects - Australia's global economic performance
Econ04.04.01	Corporate taxation – Introduction of a corporate cash flow tax, replacing corporate income tax
Econ04.04.02	Corporate taxation – Re-introduction of a corporate super profits tax
Env01.02	Climate change performance - action, international cooperation and policy
Gov08.02.01	Electoral funding reform – abolition of corporate and union donations and new taxpayer funding for elections
Gov09.02.01	Trust in corporates – perceptions of corporate versus worker power balance
Soc04.06.02	Happiness & wellbeing - optimism/pessimism

Introduction – Australia now and in the future

We have it in our power to make the world anew.

Thomas Paine, 1776

In Australia today, there is no road map showing the paths of safe travel towards the future. Nor is there a single space in which Australians have described the future they might prefer. No government has developed a plan by which we might set a course to a well-understood destination of safety, security and wellbeing. We have never taken the time to listen to each other and describe the country that we wish to live in in five years' time, let alone the one we wish to bequeath to our children in twenty or thirty years' time. In short, Australians are travelling blindly to an unknown place.

Travelling toward an unknown future without a map is at best unnecessary and at worst suicidal. In particular, it is unnecessarily expensive and economically contractionary. Moreover, at the outset of the 2020s, Australia has reached several critical turning points which make it imperative that we set out a plan for an affordable path to an acceptable quality of life. For instance:

- We have arrived at a major crossroads in our choices about energy and the environment. Do we prefer the path towards renewable energy and less global heating; or do we prefer the path towards more fossil fuels?
- We have also arrived at critical turning points about our identity as a nation. Do we wish to deal with problems arising from our violent origins as a colony and come to terms with who we want to be as a nation; or do we wish to continue with the dispossession and exclusion of First Nations peoples?
- Between 2000 and 2020 we have seen obvious growth in inequality with the rise of neoliberalism and corporate irresponsibility. Do we want to arrest that or do we want the national wealth that we all work hard to generate to be corralled by the few instead of the many?
- Between 2002 and 2020 we have seen the rise of the secret state, an increasing reluctance by governments to be held accountable, and a significant loss of rights for all Australians. Do we want to cede all power in our democracy to unaccountable and increasingly unethical agencies and corporations; or do we want to increase our influence in our own governance and our share of power in democracy?
- Since 2014, we have seen a significant decline in our participation as a leader on the international stage and our relationship with our biggest trading partner – China. Do we wish to return to being a collaborative partner with other developed and developing nations to build a more fairly shared future for humanity; or do we wish to isolate ourselves in an inevitably globalised world?

These are just some of the turning points that Australians have arrived at in the early 2020s which make a plan for the nation more urgent than ever before.

Australian Community Futures Planning (ACFP) has been established to make development of such a plan possible for any Australian that might wish to escape short term party-political platforms and look towards a safe, secure and prosperous future.

This plan – *Australia Together* – is to be developed over time by Australians *together*.

ACFP's contribution is research resources and expertise in particular in provision of an organising framework for the plan. That framework is called **National Integrated Planning & Reporting – or National IP&R**. This is an entirely democratic form of planning that can increase the shares of power held by Australians.

One of the first steps in National IP&R is to provide a picture of Australia's current overall wellbeing. This draft plan begins to paint that picture. The picture is not a very happy one; but if it is painted correctly, based on verifiable facts, and at the right time, it will be possible to detach ourselves from always having to react to crises when it is too late and to start getting ahead of them instead. While our current quality of life is declining – and declining to an extent that should not occur in such a wealthy nation – the prospects for the future are still good, as long as we do not miss the moment.

Australians are at the crossroads but by world comparisons they are wealthy, highly educated, and are blessed with some rare natural advantages such as the fact that they share no borders with other countries, have access to extraordinary renewable resources, and genuinely value the fair go for all. They value working together, social inclusion, equality of opportunity and hard work. These are all vital advantages that can be used to overcome the inertia that has led to the decline we have seen in the 21st century of Australia's society, environment, economy and democracy.

It only remains for us to harness these extraordinary natural advantages so that we can arrive safely in 2050 with an acceptable degree of wellbeing and security. The most efficient way to do that is to build a map. With our advantages and that map we have it in our power to make the world anew.

At ACFP we have drafted a **Vision** of what that new world might look like as a guide. This Vision is based on comments made by Australians about their preferred future on the rare occasions they have been asked about it in the 21st century. Governments have not listened to those comments. They have not taken the aspirations of Australians seriously enough to design a plan that will make their preferred future a reality. Through time, the Vision and this plan – ***Australia Together*** – will be refined to increase our chances of making our preferred future a reality.

The Vision for *Australia Together*

A **draft Vision for *Australia Together*** is set out on the following page. You can read about the origins of the draft Vision at this link: <https://www.austcfp.com.au/post/where-did-the-vision-for-australia-together-come-from>

To check support for this Vision and refine it as necessary, ACFP will be seeking the assistance of partners in a process that has been outlined in our [Community Engagement Program for *Australia Together*](#). For more information and to become involved in planning a better future for Australia subscribe to Australian Community Futures Planning at <https://www.austcfp.com.au/>

If we engage properly with each other, this plan can be designed to take us to whatever future we prefer – the one we haven't yet imagined but which we might long for if only we could assemble ourselves to articulate it to each other and make a run for it.

A Vision for Australia Together

By 2050, we and our children and grandchildren will be living a fulfilling life in an
Australia where

We are safe

We are reconciled with and celebrate our First Nations peoples and their cultures

Everyone is welcome to participate positively in community life

We are inspired and able to renew our physical and spiritual wellbeing

We act together as a compassionate society

Equality is valued as enriching human community, cultural harmony and social progress

Diversity is positively appreciated as a basis for a successful society

Everyone can realise their full potential in life, as individuals, members of a family and
citizens through unlimited opportunities in education and employment of choice

Vital services are fully accessible

Scarce resources are conserved and fairly shared

National wealth is fairly shared

Our economy is sustainable and supports rewarding opportunities and continuous
improvements in living standards for everyone

As a nation we have the courage to take a leading place in achieving the environmental aims
of a global society

Stewardship of ecology is affirmed as fundamental to planetary and human survival

Strong democracy is assured by a well informed and engaged community

We are confident our leaders will reflect thoughtfully on our views and best interests when
making decisions for our future

We take pride in Australia as a responsible international citizen, active in building a safer,
more peaceful and united world

These are the aspirations of our hopeful generation. We commit to this Vision for
Australia Together so that we can pass the gifts we have inherited to our children, and
they to theirs.

Limits of this draft

Readers are advised that this draft of *Australia Together* is incomplete. This is intentional.

Because a long-term plan is an entirely new approach to the way we have attempted to secure our future as a nation, ACFP has decided to release versions of the plan as they develop and grow through the acquisition of new data and the commentary of Australians. This is consistent with the fully transparent democratic form of planning that is **National Integrated Planning & Reporting**.

This draft of ***Australia Together*** is being released at the point where it is estimated to be about 60% complete so that Australians may begin to familiarise themselves with how this new plan and planning process work. The National Integrated Planning & Reporting process and the plan itself have considerable potential to inspire Australians about how they can renew their country and create a quality of life that has not yet been imagined as possible.

For further information on the next steps in development and publication of the plan see [Chapter 10 – Future additions and amendments to *Australia Together*](#).

For a brief introduction to what ***Australia Together*** is, view ACFP's Fact Sheet: [Frequently Asked Questions About *Australia Together*](#).

This plan contains numerous hyperlinks to background material.

Guidance on efficiently navigating the plan

Guidance on navigating your way in *Australia Together*

Australia Together is a long term plan for a whole nation – a road map of safe routes to a future that Australians in the early 2020s prefer to imagine as the most desirable by 2050. Accordingly it will grow into a large plan with myriad linkages between Directions, Targets, Indicators and Strategies.

To help Australians navigate their way more efficiently through the plan, ACFP has organised the framework of the plan under 57 Directions. However, additional assistance in navigation has also been provided by assembling a list of key words for Targets, Indicators and Strategies in the plan. The key word list will also grow and change over time.

Readers can search the plan to see if it currently incorporates a Target, Indicator or Strategy of interest to them either by browsing through a Direction that may be relevant or by browsing the key word list to quickly find Targets, Indicators and Strategies. Click [here](#) to browse the key word list.

Chapter 1 – About the plan

Australia Together is a plan in draft. It is Australia's first national integrated community futures plan. "Community" is the operative word.

Because it is designed to provide an organised space in which any and all Australians can consider what we want to achieve in our future and contribute ideas for strategies which fit with that future, **Australia Together is always a live space** – a space of participation in the activity of shaping our future as we would prefer it to be in our democracy. It is where we can constantly converse in an open, organised way about:

- **what** we want to become as a nation,
- **what** we want to leave for future generations, and
- **how** we can travel to that preferred future safely, fairly and with as little pain as possible.

In this live space:

- **what** we are trying to achieve as a nation will be clear and stable for a reasonable period of time (probably for two to three federal election cycles), but
- **how** we are trying to achieve it will be steadily improving and becoming more efficient.

Within the plan, **what** we want to achieve is expressed as a **Vision**. And all the things we want to become as a nation while we are on our way towards that Vision are expressed as **Directions**. The Directions set out the general routes we prefer to take to towards the Vision. This also makes it clear which routes we wish to avoid.

Australia Together relies on open, inclusive, genuine and thoughtful community engagement. It is structured to give Australians freedom to contribute suggestions for **Strategies** on **how** we can improve our chances of making our Vision a reality. It also provides a space for public assessment of whether suggested Strategies are indeed consistent with the Vision and Directions or whether they will disable us in our movement towards the Vision.

With collective use of the intelligence and good will of Australians, **Australia Together** – and **Australians**, for that matter – will become more sure-footed over time, more capable of delivering a far better future for us all.

The time horizon of *Australia Together*

Australia Together is a plan designed to ensure future generations will be left with an improved and sustainable quality of life. Its function is to stimulate an imagination of an Australia in which *all* Australians can achieve their fullest potential and realise their aspirations, without causing any serious deterioration in our overall quality of life along the way, and preferably improving it. Accordingly, the plan takes a thirty-year view and looks out to the year 2050, recognising that some things will take decades to achieve but others can be set up to be achieved sooner.

Assumptions underpinning the plan

Australia Together is built on an assumption that a plan which accommodates us **in all our diversity** is the strongest of all plans. Its purpose is to bring us together, and because we are all different **it is structured to ensure that we can succeed as a cohesive nation because of our diversity, not despite it.**

In **Australia Together** our diversity is not something to be lost, it is to be capitalised on.

This draft of **Australia Together** is the result of detailed research about how a plan for a nation can be effectively and validly structured, how it can be entirely accessible, and how it can change over time as we work together to refine it. This research has been published by the Founder of Australian Community Futures Planning, Bronwyn Kelly, in [By 2050: Planning a better future for our children in 21st century democratic Australia.](#)

By 2050 functions as:

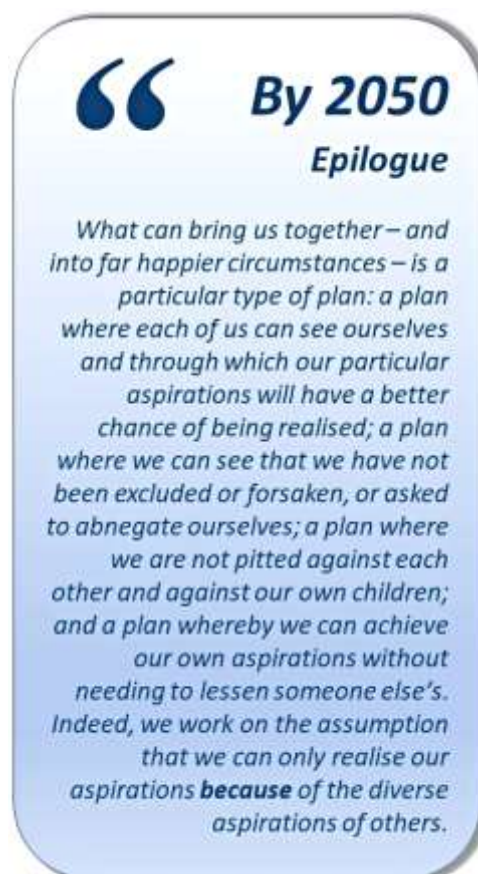

- as an issues paper for Australia as at the outset of the 2020 decade, examining our current capacity, strengths and weaknesses as a modern economy and a democratic nation,
- an examination of our preparedness for the future, and
- a practical guide on how Australians can organise themselves to plan to secure their preferred future.

For further background on the issues and assumptions underpinning this version of **Australia Together**:

- visit Australian Community Futures Planning at <https://www.austcfp.com.au/>, or
- read **By 2050** available on Amazon Kindle, or
- view the pictorial version of **By 2050** in the videocast series, [The State of Australia in 2020](#), on YouTube.

Research in **By 2050** has also led to the establishment of **Australian Community Futures Planning – ACFP**. ACFP has been founded for the purpose of encouraging greater participation by Australians in planning their own future as a nation within a 21st century democracy. It is an independent centre of excellence in national community futures planning, providing resources and an organising framework that can enable any and all Australians to increase the chances of improving our entire quality of life – our society, our environment, our economy and our governance.

Australian Community Futures Planning operates as a centre of excellence by fostering the effective use of [National Integrated Planning & Reporting – IP&R](#). **National IP&R** is effectively democracy's modern agora and is the process by which we can develop the plans most likely to deliver the future we want. For more information on National IP&R visit <https://www.austcfp.com.au/fag>

The planning cycle of *Australia Together*

Australian Community Futures Planning is organising a national integrated community futures planning framework – National IP&R – which will operate in a repeating cycle. This cycle is aligned with the federal government election cycle. **Full implementation of this cycle depends entirely on volunteer resource availability.**

The cycle begins immediately after a federal election with development of a draft national community futures plan (or with a revision of the plan from the previous cycle). Subject to resources:

- consultation on aspects of the draft then occurs in accordance with a community engagement program, and
- nation-wide surveys of support for aspects of the draft are undertaken.

Throughout the cycles the following activities are ongoing, subject to resources:

- Development of **Targets and Indicators** for measuring progress in the plan – the nation's movement towards or away from the Vision and Directions.
- Development, assessment and assembly of **Strategies** that are consistent with the Vision and Directions.

Towards the end of each cycle – and before a federal election – an **End of Term Report** is produced. Based on performance against the Targets and Indicators of the plan, this report provides a factual assessment of whether during the federal parliament's term of office Australia moved closer to its preferred future or further away. The End of Term Report can also provide insights for development of a revision of ***Australia Together*** in its subsequent cycle.

The cycle allows Australians to drive their democracy in an organised, efficient and intelligent way, to maximise the chances of equitable progress towards the Vision and build national cohesion and resilience.

Note: Until the first cycle of production of ***Australia Together*** has been completed it will not be possible to rely on data produced in an End of Term Report for a previous election cycle. However, significant data has been assembled by ACFP on its [State of Australia webpage](#) which functions in a similar fashion to an End of Term Report, inasmuch as it provides significant insights into the performance of Australian governance and corporations in the 21st century and isolates the priority issues that must be dealt with by 2030 if Australians are to arrive safely in 2050 with an acceptable degree of wellbeing and security.

Chapter 2 – The structure of *Australia Together*

Australia Together is being developed by Australians for Australians and is our country's first national community-based futures plan. It **integrates** our Strategies for a better quality of life by 2050 and makes sure they will fit with the Directions we would prefer to take to reach our Vision. The plan is structured along what is known as the “**Quadruple Bottom Line**” or QBL. This simply means that it covers our aspirations for a better:

- *Society,*
- *Environment,*
- *Economy, and*
- *Governance.*

Integration is the key to success

Integration of Directions and diverse Strategies – via use of a simple, clear structure and a system of Targets and Indicators for monitoring ongoing wellbeing – is the key to success in delivering the Vision. The more we link our diverse efforts, the less we will suffer by working at cross-purposes to each other and the faster we will move towards our Vision.

This integrating approach is based on a form of community engagement and long term planning and reporting adopted prior to 2010 by local governments in some states of Australia for local community driven planning. In developing this draft of **Australia Together** for community engagement, Australian Community Futures Planning has adapted local community “Integrated Planning & Reporting” – or “IP&R” – to devise Australia’s first *National* Integrated Planning & Reporting Framework. Within that framework, **Australia Together** is Australia’s first National Community Futures Plan.

National IP&R brings democracy alive, efficiently.
It allows Australians in all their diversity to connect and build a coherent plan for safe arrival in a truly preferred future – a future which has not yet been fully articulated but which is out there waiting to be seized.

National IP&R
is effectively democracy's modern agora. It is a space in which we can work together to develop the plans most likely to deliver the future we want.

How has the *Vision of Australia Together* been developed?

The **Vision of Australia Together** is a draft for purposes of discussion by Australians. It has been developed by analysing a range of long term Vision statements that have been put together already by Australians in an array of community engagement and survey programs conducted in various parts of Australia in the decade to 2020. These include:

- visions developed by local councils across Australia in consultation with their communities;
- visions (or approximations of visions) developed by some state governments for the future of their states;
- a vision for “Australia reMADE”, developed via a wide-ranging community engagement program in 2017 by a group of civil society and environmental organisations in association with the National Congress of Australia’s First Peoples;
- a vision of the aspirations of Australians developed by the Australian Bureau of Statistics in association with its Measures of Australia’s Progress program in 2013; and
- an “outlook vision” developed by member organisations of the Australian National Outlook 2019 (National Australia Bank, business leaders, universities, non-profits and the CSIRO).

*Note that the above publications are some of the sources of the Vision. These organisations do not necessarily endorse the Vision, nor have they been asked to endorse it.

The Vision for **Australia Together** takes elements of all these visions and puts them together, along with some others such as:

- the United Nations Sustainable Development Goals (to which Australia is a signatory),
- the Business Council of Australia’s “Vision for Australia”, and
- the Centre for Policy Development’s 2017 Discussion Paper, “What Do Australians Want?”.

There is a reasonable certainty that the resultant draft Vision will resonate with Australians, due to the fact that it has been sourced from very diverse communities of interest. Despite their diversity, these communities of interest have shown a staggeringly similar understanding of the hopes and dreams of Australians. With the possible exception of the Business Council of Australia, they all want the same things and share the same aspirations for future generations. Nevertheless, at the outset of every planning cycle (every three to four years) the support of Australians for the Vision of **Australia Together** should be assessed by statistically valid nation-wide surveys. This is subject to availability of resources.

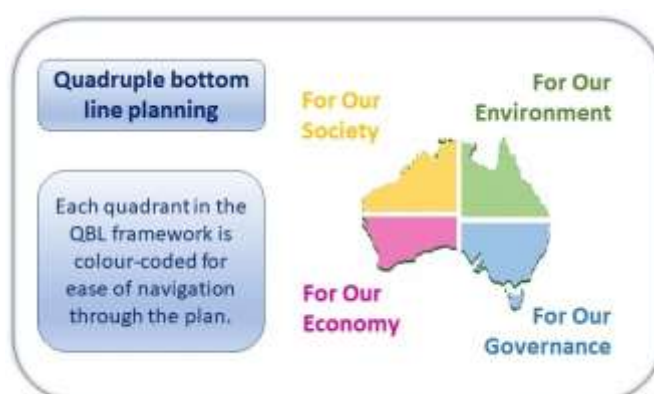

Further information on how the Vision has been drafted can be found in **By 2050**. See also the Blog on the Australian Community Futures Planning website called [Where did the Vision for Australia Together come from?](https://www.austcfp.com.au/blog/Where%20did%20the%20Vision%20for%20Australia%20Together%20come%20from%3F) at <https://www.austcfp.com.au/blog>

How have the Directions of *Australia Together* been developed?

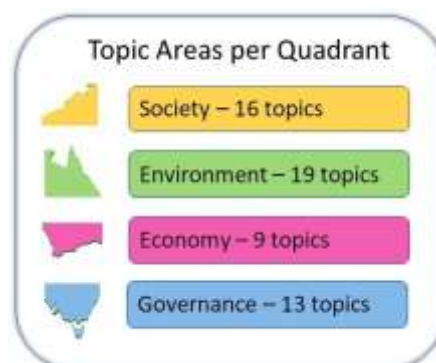

Like the Vision, the Directions of ***Australia Together*** are a draft for purposes of discussion by Australians. They have been built first by taking the “topic areas” of policy, legislation, administration, institutions and services that we rely on when running our country and grouping them into the above mentioned four categories of **Society**, **Environment**, **Economy** and **Governance**.

Once these topic areas of policy and administration have been assembled into the QBL framework, we can describe a preferred Direction of travel in each topic area. Effectively, this functions to describe in more detail what we want to become as a nation, and we can reconcile this back to the Vision.

The Directions of the plan for ***Australia Together*** constitute the means of steering ourselves toward the preferred future described in our Vision. They are signposts that help us avoid the costly mistakes of taking paths in policy, legislation, administration, institutions and services that might drag us away from realising the Vision. Directions are essentially part of the Vision – creating a surer path for us for selection of the most effective and equitable set of Strategies.

For ***Australia Together***, 57 topic areas have been isolated and grouped into the QBL framework as set out below. Each quadrant in the QBL has been assigned a colour, for ease of navigation through the plan. A numbering system has also been designed for tracking purposes and to assist people to see clearly how Targets, Indicators and Strategies are contributing to the fulfilment of various Directions. The 57 topic areas are distributed across the quadrants as shown here.

Quadrant	Topic areas for the Directions of <i>Australia Together</i>	
Our Society 	Soc 1	Safety
	Soc 2	Indigenous heart
	Soc 3	Belonging & inclusion
	Soc 4	Health & wellbeing

Direction statements for each topic area

Within each topic area a description has been applied about a Direction of travel. These Directions describe what Australia will become in accordance with the Vision if we travel via certain routes. They are our signposts for safe travel.

As stated above, the Directions form part of the Vision but they also serve to guide progress away from routes we wish to avoid. For instance, in relation to the topic area of **Society**

12 – Aged care & disability services, a Direction statement has been selected suggesting that Australia will become “**a sure provider of lifelong dignity**”. This expression of a Direction is a safeguard against exclusion of a potentially disadvantaged group. The 57 Direction Statements taken together could be said to describe the character of the nation, land and home that Australia will become if, as a collective, we pursue the Vision via these 57 routes.

Resources permitting, Australians will be asked in community engagement whether they want Australia to travel in these Directions or suggest different routes. This may result in amendments to the drafted wording of the Vision and/or Directions. Results of engagement on the wording of the Vision and Directions will be published in full.

How are Targets & Indicators being developed for *Australia Together*?

The quadruple bottom line planning framework provides a convenient way of organising Targets and Indicators that we can then use to monitor our progress towards or away from the Vision and whether we are still on course with the Directions. This QBL approach is not new. It is an approach that has been taken by agencies such as the Australian Bureau of Statistics in its Measures of Australia's Progress (MAP) project. Due to withdrawal of government funding, MAP was closed down in 2014. In ***Australia Together***, ACFP is re-starting the QBL method to organise a **National Wellbeing Index**. This comprehensive Index is more detailed and integrated than the MAP project and will function not just as a register of baseline data but as a mechanism for connecting baselines to Targets. This is new. These connections will make it possible not just to transparently measure “progress” (as MAP did) but to gauge our movement towards or away from the specific Targets that have been deemed to be consistent with preferred Directions and the Vision.

In ***Australia Together***, Indicators of wellbeing in terms of society, the environment, the economy and governance have been and will continue to be collected from a variety of sources. As they are collected, they will be connected to Targets. Collection of Indicators and baseline data and development of Targets will be ongoing.

For a number of Targets, connections will also be made with the United Nations' Sustainable Development Goals (SDGs). Australia is a signatory to the UNSDGs which means that as a nation we have already made commitments meet to seventeen SDGs by 2030. The Department of Foreign Affairs & Trade is developing a monitoring program to enable Australia to report on progress towards the adopted SDGs. Targets in ***Australia Together*** are entirely consistent with the adopted SDGs but the QBL National Wellbeing Index in this plan provides a more comprehensive monitoring system for progress towards the SDGs and extends beyond 2030.

Direction statements are signposts of the safe routes in the map to our preferred future.

How are Strategies being developed for *Australia Together*?

Strategies for ***Australia Together*** are being developed over time via two processes.

Process 1 – Integrating existing Strategies:

This involves establishing a framework in which existing Strategies that have potential to deliver our Vision can be progressively gathered and integrated. At the outset of 2020, Australia had no central location which registers Strategies already in existence and no way of linking them to determine whether they overlap, double up, enhance each other or defeat each other. Because this central portal did not exist there was also no efficient way of determining where Strategies that we need do not yet exist. ***Australia Together*** is being built slowly to function as such a portal, a place to which anyone can go to search for Strategies that are consistent with the Vision for ***Australia Together*** and to create networks of cooperation for Strategy.

Process 2 – Imagining new Strategies:

This involves examining each of the Directions, setting Targets for how far we wish to travel in that Direction and imagining new Strategies that will take us to the Target. Targets and Strategies emerging from this process will often contribute to the achievement of more than one Direction. This is the virtue of Integrated Planning & Reporting. Within the framework, imagination enhances the power of all the other Strategies.

How are decisions made about inclusion of Targets and Strategies?

National IP&R is community driven – bottom-up – planning where the intention is that a community ownership of ***Australia Together*** can grow over time and we can reach a high degree of confidence that the plan does indeed present the best possible chance of delivering the future we want **in all our diversity**.

Accordingly, once a general level of agreement has been reached about the Vision and Directions, suggestions can be made by anyone for inclusion of a Target or Strategy in the plan. Indeed, the IP&R process welcomes such creativity and participation. It is designed to inspire Australians to be expansive in their thinking about what can be achieved in social cohesion, environmental and economic sustainability, and fair and ethical governance. However, a case must be made each time as to whether and how a suggestion will contribute positively to particular Directions and to the Vision and will do so without unduly disabling other parts of the plan.

In this draft of ***Australia Together***, ACFP has:

- commenced selecting Targets and Strategies after detailed examination in **By 2050** of issues affecting Australia's future, and has
- begun to assemble them so that they form "**a starting plan**", as it were.

Additional Targets and Strategies will be added and existing ones can be revised, replaced or deleted at any time within an orderly assessment framework. This framework is set out in the ***Community Engagement Program for Australia Together***, accessible at <https://www.austcfp.com.au/faq>

How are priority Targets and Strategies to be isolated?

Important Note

This issue of ***Australia Together*** begins the process of Strategy development by focussing in the first instance on twenty key issues that must be solved by 2030 if we are to arrive safely in 2050 with an acceptable degree of wellbeing and security.

These issues are identified in the videocast series, ***The State of Australia in 2020***.

This issue of ***Australia Together*** begins the process of linking these key Targets and Strategies.

The linked priority Targets and Strategies isolated thus far are set out in more detail in Chapter 9 under headings shown below for **Society**, **Environment**, **Economy** and **Governance**.

This list will grow with each edition of

Australia Together.

Top priority Targets and Strategies in Our Society (Starting Draft)

• Constitutional recognition of First Nations	Soc02.01
• Re-introduction of fee-free tertiary education	Soc05.01
• Reverse public school underfunding and private school overfunding	Soc05.02.01
• Universal access to free childcare	Soc11.01
• End domestic violence by restoring funding for shelters and support services enabling 100% of women threatened by domestic violence to escape to safety	Soc10.05
• Aged Care Royal Commission – Implementation of Recommendations: New independent and accountable institutional arrangements	Soc12.03.01
• Sovereign Capability Strategy for National Resilience in Global Crises	Soc16.01

Top priority Targets and Strategies in Our Environment (Starting Draft)

<ul style="list-style-type: none"> Achievement of net zero carbon emissions within a carbon budget that will maximise chances of limiting global heating to 1.5° Celsius 	Env02.01 Env02.01.01 Env02.01.02

<ul style="list-style-type: none"> Integrated Strategy for Defence, Diplomacy and Security 	Gov12.04	
<ul style="list-style-type: none"> Electoral funding reform – abolition of corporate and union donations and new taxpayer funding for elections 	Gov08.02.01	

How will an End of Term Report be developed for *Australia Together*?

A key feature of Integrated Planning & Reporting is, of course, regular comprehensive reporting. The **End of Term Report** is a factual report on movement towards or away from Targets relative to the baselines established in the plan. Baselines are set out for every Target, Indicator and Strategy alongside a list of which Directions they contribute to. Many Targets and Strategies contribute not just to one but to several Directions at once.

For every Target, Indicator & Strategy, a baseline is established alongside a list of which Directions they contribute to

Target, Indicator or Strategy	Direction	Baseline
Targets, Indicators & Strategies for the success of Our Society		
<i>Strategy 1 – Safety</i>		
Targets, Indicators & Strategies for successful performance	In the Direction of becoming ...	Baseline data
Safety in the home <i>Indicator 1.1</i> The percentage of people who feel safe when at home alone after dark meets or exceeds 95%.	Yes 3 A safe home.	In 2018, 90.4% of Australians reported feeling safe when at home after dark. Source: ABS 4008.0 Table 10.1.2018
Safety on transport <i>Indicator 1.2</i> The percentage of people who feel safe when waiting for public transport alone after dark meets or exceeds 50%.	Yes 3 A safe home.	In 2018, 28.8% of Australians reported feeling safe when waiting for public transport alone after dark. Source: ABS 4008.0 Table 10.1.2018

The baseline data form the basis of the QBL National Wellbeing Index but they are linked with Targets, Indicators and Strategies and Directions for measurement purposes. End of Term Reports roll up lots of data into easily viewed pictures of the truth about our changing wellbeing – both the perception of it and the physical reality. At election time, or throughout the period of the elected government, anyone can go to this one-stop-shop for non-partisan evidence about movement towards or away from our Vision for a better life. And the evidence can be viewed in as much or as little detail as we prefer. Crucially, it is objective evidence. Even the evidence about our perceptions is objective in the sense that it will come from statistically valid surveys reporting our satisfaction with progress. When combined with data on physical measures it will be possible to see the trend during the period. Those trends can be represented simply on one page and might look like the following table (but obviously the arrows are not based on data at this time and are purely illustrative of how results may be pictorially represented).

Draft Vision for <i>Australia Together</i> Perceived and actual progress		
Vision	Perception of progress towards the Vision	Progress taking into account perceptions and physical measures
We are safe	→	←
We are reconciled with and celebrate our First Nations peoples and their cultures	←	←
Everyone is welcome to participate positively in community life	← →	← →
... and so on ... until all aspects of the Vision have been assessed		

Chapter 3 – The Directions of *Australia Together*

In ***Australia Together***, the Directions of travel are:

- socially inclusive, equitable and intelligent,
- environmentally sustainable,
- economically fair and resilient, and
- democratically open and ethical.

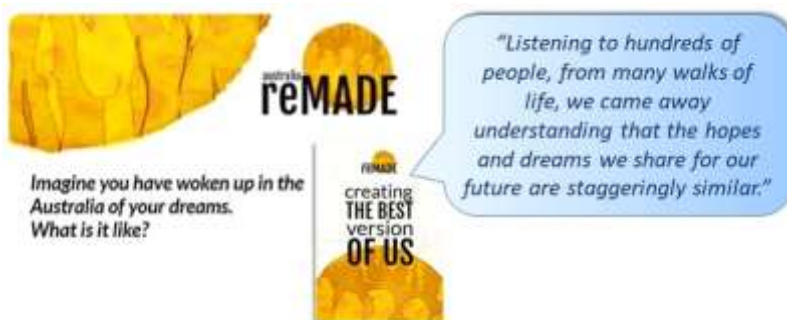

To describe the safe path in each topic area, a single Direction Statement has been drafted as the probable acceptable course towards the Vision, based on reviews of the preferences of Australians over the decade to 2020 about their aspirations, values, dreams, and concerns for their quality of life. The Targets and Indicators of the plan have been scoped to enable us to travel safely in these Directions.

If Australians, on survey, prefer to travel in Directions different to these, then amendments will need to be made to the Directions. However, in this event it is unlikely that amendments will need to be made to Indicators and baselines due to the fact that the Directions, Targets and Indicators are organised along the QBL and therefore cover all the topic areas of policy, legislation, administration, institutions and services that we need to monitor anyway if we are to be assured that our country is being run efficiently. These Indicators and baselines are just as likely to work well for modified Directions, and the work on the QBL National Wellbeing Index should not therefore be wasted.

Both the Vision for *Australia Together* and the Direction Statements can be sanity checked by Australians via a simple method. This involves imagining them in reverse – imagining becoming the opposite of the way the Australia of the future is described in the Directions. Such an exercise is useful in two ways.

Firstly, it helps us see that, when it comes to what we want for the future, we hold “staggeringly similar” sets of values and aspirations. This is a nation entirely capable of thinking and acting together for a shared long-term outcome.

Secondly, imagining the reverse of the Direction Statements helps us identify and steer ourselves away from what we want to avoid in our future. The Direction Statements are a way of organising our collective efforts to make our “staggeringly similar” dreams a reality. They give a practical boost to our chances of making our ideal future a reality.

Surveys about the values of Australians consistently indicate that we can envision and agree on what we want easily enough. But we are not organised to get there. The Directions Statements help us get organised. They help us work together, instead of tripping each other up. The next sections provide the starting draft of the Directions for ***Australia Together***.

Directions in Our Society – Starting Draft

16 directions for our society

Directions in Our Society			
In Our Society		Australia becomes:
Soc 1	Safety	A safe home
Soc 2	Indigenous heart	A land with an Indigenous heart
Soc 3	Belonging & inclusion	Inclusive, welcoming & enabling
Soc 4	Health & wellbeing	A place of optimal health and wellbeing
Soc 5	Education	A model of educational opportunity
Soc 6	Equality	A society of equals
Soc 7	Diversity	A success because of its diversity
Soc 8	Women & LGBTIQ+	A success because of gender equality
Soc 9	Housing	A land without homelessness and with decent affordable housing for all
Soc 10	Family cohesion & community services	A place of supportive familial & other connections & without domestic abuse
Soc 11	Early childhood care	A land without child disadvantage
Soc 12	Aged care & disability services	A sure provider of lifelong dignity
Soc 13	Arts & culture	A wellspring of inspiration & creativity
Soc 14	Police services	A model of community service & responsible exercise of authority in policing
Soc 15	Justice	Confident of justice for all
Soc 16	Emergency services	A society prepared and resilient in times of disaster

Directions in Our Environment – Starting Draft

19 directions for our environment

Directions in our Environment			
In Our Environment		Australia becomes:
Env 1	Environmental advocacy	A leading global advocate for action on climate change
Env 2	Climate change prevention	A net zero emissions nation
Env 3	Climate change adaptation	A proactive planner of climate change adaptation
Env 4	Environmental regulation & approvals	A nation that puts the environment before unsustainable consumption
Env 5	Environmental education	An environmentally educated community
Env 6	Energy	A renewable energy superpower
Env 7	Transport	Efficiently connected through low emissions transport
Env 8	Agriculture	Environmentally and economically sustainable in agriculture
Env 9	Fresh water supply	Confident of safety and security of its water supplies
Env 10	Biodiversity	A biodiversity haven
Env 11	Vegetation	A replanted and reforested land
Env 12	Land & resource conservation	A protector of scarce resources
Env 13	Parks & open space	A provider of accessible national & urban parkland
Env 14	Air & water quality	A pollution free biosphere
Env 15	Marine protection	A marine wildlife haven
Env 16	Waste reduction & recycling	A producer of zero waste
Env 17	Architectural & cultural site heritage	A conservator of cultural & built heritage
Env 18	Cities planning	Multi-central in its cities, efficiently connecting people with jobs, health, education and recreation
Env 19	Regional planning	A land of thriving self-supporting regions

Directions in Our Economy – Starting Draft

9 directions for our economy

Directions in Our Economy				
In Our Economy			Australia becomes:	
Econ 1	Economic planning, growth & transition	A model of transition from excessive consumption to sustainability	
Econ 2	Employment planning & industry transition	A model of employment planning & justice in industry transition	
Econ 3	Equitable improvement in living standards	A country where economic opportunity, growth & prosperity are equitably shared & living standards improve continuously for all	
Econ 4	National wealth generation & sharing	A nation fairly raising and sharing its wealth	
Econ 5	Market regulation & competition policy	A strong regulator of fairness in markets creating confidence for investors	
Econ 6	Government competitive business participation	An economy with competitive & profitable public participation	
Econ 7	Science, research, innovation & collaboration	A collaborative intelligent nation	
Econ 8	Technology development & digitisation	Enabled in meeting the communication & information demands of the future	
Econ 9	International economic engagement & trade	Productive and prosperous through fair trade agreements	

Directions in Our Governance – Starting Draft

13 directions for our governance

Directions in Our Governance				
In Our Governance			Australia becomes:	
Gov 1	Strength of democracy	A proactive participatory democracy	
Gov 2	National values & identity	A nation knowing and affirming decency	
Gov 3	Human & other rights	A nation with avowed rights for all	
Gov 4	Constitutional reform	A free, self-governing, modern nation	
Gov 5	Transparency, openness & accountability	Open, transparent & accountable in its governments & institutions	
Gov 6	Government ethics	A world benchmark in leaders' conduct	
Gov 7	Public service independence & excellence	Committed to public service independence & excellence	
Gov 8	Electoral system & funding reform	Protected from undue sectional influence in elections	
Gov 9	Corporate & NGO responsibility	A nation outlawing corporate greed & encouraging private sector ethics & community partnership	
Gov 10	Free communications policy & regulation	A guardian of freedom & accountability in political discourse, news media & the wider information market	
Gov 11	International participation & global justice	A just participant on the global stage	
Gov 12	Peace & security	A nation assured of enduring peace	
Gov 13	Humanitarian effort	A nation leading in empathy & global cohesion	

Chapter 4 – The Targets and Indicators of *Australia Together* – the QBL National Wellbeing Index

With any strategic plan we need to know just how far we want to travel in the Directions we've set. We need to have our eye firmly on the preferred Targets and make sure we select the best available Indicators of progress towards those Targets.

Sometimes the Targets can be expressed in terms of tangible physical outcomes that we want. At other times, especially if we're trying to measure social wellbeing, it's not so easy to define a "hard edged" objective Target. In that case we need to rely on somewhat more subjective or qualitative impressions, and the consensus about those, to get an "indication" of progress rather than an objective or physically quantifiable measure of it.

Australia Together aims to measure progress:

- toward or away from the Vision, **and**
- toward or away from our Quadruple Bottom Line aspirations for the type of society, environment, economy and governance we want.

This comprehends that our wellbeing is a function of a web of multiple but interconnected factors. For the purpose of measuring this progress, ***Australia Together*** must build and rely on a mixture of:

- objective targets for physical outcomes, and
- more subjective indicators of improving quality of life as evidenced by surveys of community attitudes, perceptions and satisfaction.

Taken together these will give us a reliable holistic picture of wellbeing for ourselves and the environment, economy and democracy we live in – as the interdependent things that they are.

The level of ambition in Targets

The Targets in ***Australia Together*** are being set at various levels of ambition.

- Sometimes the ambition will be simply to maintain the status quo and ensure that quality of life on those particular Indicators does not deteriorate – at least until Australians decide they want to strive for a significant improvement.
- At other times, the Targets will be set to strive for significant improvement.

In this first draft of ***Australia Together***, the level of ambition for each Target will generally be set based on the research and findings set out in [By 2050](#) and in [The State of Australia in 2020](#) about Australia's current wellbeing and our capacity, strengths and weaknesses as a modern

How far do we want to travel in each of the Directions of *Australia Together*?

For something that is really important to us – we need to Aim High. Aim to fix it. That is what a long term plan is for.

“

By 2050
Chapter 6

When it comes to issues that we all know are important – but which we might tend to think are too difficult to solve or intractable – setting ambitious targets is not only vital to solving the problem, it is the cheapest thing to do over the longer term. Aiming high – aiming to fully fix the problem, not just fiddle at the edges – is the key to success, and to efficiency in success.

”

economy, democracy and environmental custodian. Baseline data for the Targets, Indicators and Strategies, taken together, will generally reflect the QBL health and wellbeing of Australia at the outset of the 2020s, as assessed in **By 2050** and in other relevant research as and when it may come to light. They translate the general and particular findings of **By 2050** and [The State of Australia in 2020](#) into observable data about Australia in 2020 (or thereabouts) and integrate those data points into a single space – the QBL National Wellbeing Index. This work will be ongoing. The current assessed health and wellbeing of Australia indicated by the individual baseline data points could be regarded as:

- poor in the areas where Targets are ambitious, and
- reasonable or good in the areas where targets are simply set to ensure no deterioration in that quality of life on that particular Indicator.

The top twenty issues to solve by 2030

By 2050 assembles research across a wide variety of quality of life issues and references hundreds of statistical data points and observations of researchers, journalists, historians, scientists, economists and policy commentators. As such, **By 2050** functions as far as possible as a consolidated issues paper for Australia, marking a point in time – the beginning of the 2020s. The findings are that Australia is not in good shape in terms of its current health and wellbeing and its preparedness for future challenges and is struggling particularly with twenty critical issues that must be solved by 2030, if possible, to ensure we arrive safely in 2050 with an acceptable degree of wellbeing and security.

These twenty issues have been set out in Australian Community Futures Planning's seven part videocast series, **The State of Australia in 2020**, accessible on [YouTube](#) and at <https://www.austcfp.com.au/state-of-australia>

The identified twenty critical issues are:

- | | |
|---|--|
| 1. Growing inequality | 12. Economic decline |
| 2. Growing poverty, homelessness and hunger | 13. Lost public ownership |
| 3. Loss of the fair go for all | 14. Inertia in transition to decarbonisation |
| 4. Growth in racial and religious conflict | 15. Environmental decline |
| 5. Indigenous exclusion | 16. Climate policy failure and steps to avoid climate change |
| 6. An outmoded and failing Constitution | 17. Declining health and safety at home |
| 7. Loss of rights, open governance and transparency | 18. Declining educational attainment |
| 8. Declining participation in democracy | 19. Declining quality of life and loss of social cohesion |
| 9. Unethical governance | 20. Declining wellbeing and happiness |
| 10. Fractious international relations | |
| 11. Corporate irresponsibility | |

Factual details and data presented in **The State of Australia in 2020** provide many of the starting points for **Australia Together** – i.e., they provide much of the baseline data which forms the QBL National Wellbeing Index. Because the datapoints on the twenty critical issues function to pinpoint some of our biggest weaknesses as a nation in 2020, they also function as the basis for some of the most ambitious Targets that Australians can draft into their first national community futures plan.

Targets have been and will continue to be selected on the basis of the minimum deemed necessary to meet the QBL aspirations of Australians and move as close as we might hope towards realisation of the **Vision of Australia Together** by 2050.

For a deeper insight into the genesis of or background to the Targets in this draft of **Australia Together**, see [By 2050](#), particularly:

- Chapters 2, 8, 9 and 11 in relation to Targets on human rights and Constitutional reform,
- Chapters 6, 8, and 11 in relation to Targets for the environment and climate change;
- Chapter 7 and 8 in relation to Targets for the national economy, welfare, taxation, employment and industry transition;
- Chapter 9 in relation to Targets in the area of inequality;
- Chapters 4, 7, 9, 10 and 11 for education, health, domestic safety, poverty and homelessness;
- Chapters 4 and 11 in relation to Targets for reform of the state and federal public services.

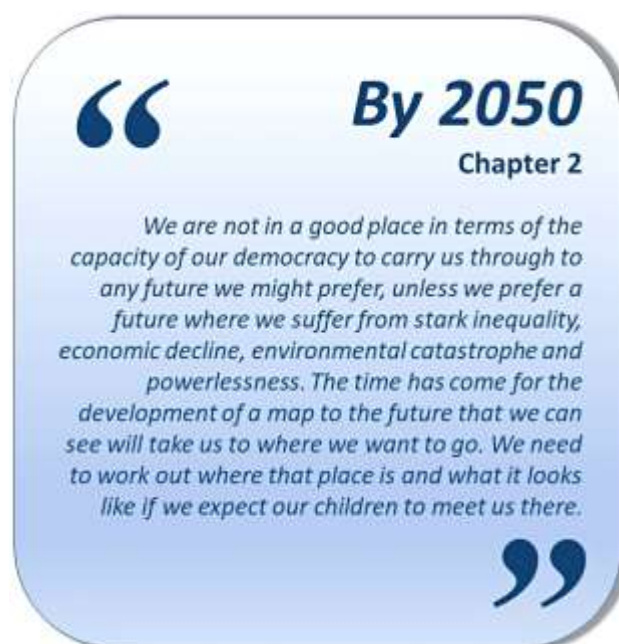

As stated in above, several of the Targets also have their genesis in the **United Nations Sustainable Development Goals 2015**, to which Australia is a signatory.

It is regrettable that few if any of the explanations in **By 2050**, which provide context to the more *ambitious* Targets in this draft, portray Australia's current health and wellbeing in a net positive light. Indeed, overall – and despite our relative wealth as a developed nation – Australia is not performing well compared to other developed nations. Part of the purpose of **Australia Together** is to turn this situation around and find the least cost most acceptable way to do it over the medium to longer term.

As a rule of thumb, readers should assume that if a Target appears ambitious, this is because Australia has been found to be performing poorly in that area and that the future of our children and grandchildren is dependent on our taking on as much responsibility as we can in the 2020s to meet that Target at the lowest long run cost. The QBL National Wellbeing Index provides the data Australians need to know in 2020 so that they can understand the extent of effort needed to arrive safely home in 2050.

Throughout the planning cycle for **Australia Together** (see Chapter 1 above), Australians will have multiple opportunities to provide input and assistance on all aspects of **Australia Together**, including insight into relevant Targets and Strategies. For information about how and when to provide assistance and intelligence, visit **Australian Community Futures Planning** at www.austcfp.com.au

Important Note: This draft of Australia Together does not yet include all the Targets, Indicators and Strategies that will be applicable. These omissions are intentional and will be corrected over time with the input of Australians.

Note regarding the layout of Targets, Indicators & Strategies in Chapters 5 to 8

Australia Together is a plan designed to help Australians maximise their chances of making the Vision a reality. This is a very big undertaking, especially as it involves integrating a large number of Targets, Indicators and Strategies so that they help us travel in the right Directions towards the Vision, instead of via routes we would wish to avoid.

Accordingly it is important to organise the plan so that actual progress towards or away from the Vision can be easily examined and reported on and so that the course of travel, if necessary, can be reset if something goes wrong and before it is too late. For this purpose:

1. **Targets and Indicators** of progress are being progressively built into the plan to facilitate reporting on real **outcomes** – for example, whether life expectancy or mental ill-health are increasing or decreasing; **and**
2. **Strategies** are being progressively built into the plan that function as the most effective **inputs** to increase the chance of meeting desired **outcomes** – for example:
 - a **Strategy** of increased funding for public health may be included to contribute to the achievement of a desired **outcome** such as increased life expectancy; **or**
 - several integrated **Strategies** to reduce inequality, homelessness and poverty may be included to contribute to achievement of multiple desired **outcomes** such as increased life expectancy and decreased mental ill-health.

Targets, Indicators and Strategies are all:

- a) generated from a particular **baseline** (always shown in the right hand column of the following tables), and
- b) geared towards a particular Direction or multiple Directions of travel.

Most Strategies are geared up to contribute to more than one Direction; but they too come with inbuilt Targets, such as a year by which they must be reached.

Targets, Indicators, Strategies and Directions are therefore all inter-related; this is an essential feature of Integrated Planning & Reporting. Integration is what speeds up progress towards the Vision and reduces the cost of reaching it over time.

Because the Targets, Indicators, Strategies and Directions are all inter-related, ACFP has chosen to link each of them within and across Chapters 5 to 8, using the Directions as the central way of organising the linkages in the plan. Effectively, the Directions are the routes by which we move from each specific baseline safely through to its relevant Target.

To make it as easy as possible to follow the plan (the map) and to report on outcomes, the Targets, Indicators and Strategies have been listed under **keyword or phrase headings** (always shown in the left hand column of the following tables). Readers looking for Targets and Strategies in a topic area of particular concern to them can simply search on a keyword using the normal “Find” function on the PDF electronic reader or [use the keyword/phrase list in Chapter 10](#) to locate the map position of the topic they are seeking in the plan. That map position is represented by a unique number.

If a topic of particular interest is not yet included in the plan, it is likely to be included in a subsequent edition. Suggestions for inclusions can be made during public comment periods as they open from time to time. For information of how and when to make suggestions, see the [Community Engagement Program for Australia Together](#).

Chapter 5 – Targets, Indicators & Strategies for Success in Our Society

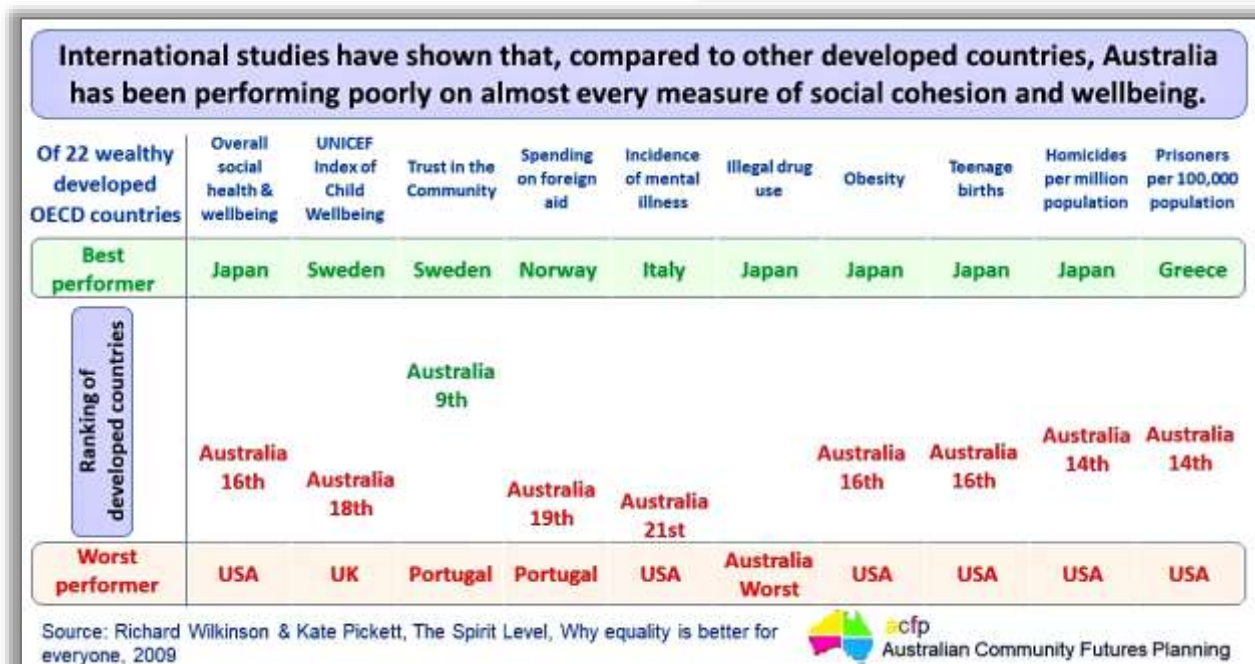

Brief context for the Targets, Indicators & Strategies for Our Society

At the outset of the 2020s the expectation of a fair go for all Australians is in decline. Income inequality has been growing slowly but steadily over the last two decades and wealth inequality has markedly increased. Between 2014 and 2018:

- the wealthiest 25% of Australians increased their income by nearly double that of median household incomes, while the wealth holdings of the poorest 20% of households actually declined; and
- while the wealth of the *average* Australian household surged past \$1 million, low-income families have seen no increase in their net worth for more than a decade.

This has resulted in Australia's economy being smaller and growing more slowly than it would otherwise. But more than that – because in a developed country like Australia, improved wellbeing arises less from continued economic growth than it does from ***fair sharing*** of any growth in national income and wealth – **Australia has inevitably been slipping on all manner of other measures of social health and happiness as shown below.**

The above study by epidemiologists in 2009¹ provides evidence that **increasing inequality in wealthy countries is strongly correlated with decreasing health and wellbeing**. And regrettably, through the 21st century the picture has worsened for Australia. For instance:

1. The Scanlon Foundation's Index of Social Cohesion has declined from its baseline of 100 in 2009 to 89.6 in 2019 and most notably along racial, religious and cultural lines. **More people reporting a decline in their sense of belonging and experience of rejection because of their skin colour, ethnic origin or religion.**²
2. **Australia's First Nations, Aboriginal and Torres Strait Islanders, languish in entrenched disadvantage** compared to non-Indigenous Australians on every indicator of health and wellbeing.

3. Australians are suffering **significant increases in diabetes, obesity, mental health and behavioural conditions**.

The health of Australians is declining at alarming rates in some cases.

Disease	Growth of disease		
Rate of obesity in adult Australians	18.7% in 1995	31.3% in 2018	66% increase since 1995
Rate of diabetes in adult Australians	3.3% in 2001	4.9% in 2018	50% increase since 2001
Number of adult Australians suffering mental health or behavioural conditions	4,000,000 in 2015	4,800,000 in 2018	20% increase in only 3 years

No reduction has been observed in the incidence of other diseases, including heart disease, asthma, cancer, arthritis, osteoporosis, high blood pressure, hypertension or kidney disease.

4. Poverty, hunger and homelessness are rising.
5. Educational attainment for school children has plummeted³.

6. Australia's claim to be "the best place in the world to raise a child"⁴ is without basis, inasmuch as the latest comparative data from UNICEF shows that in terms of both the material wellbeing of children and their health and safety, Australia scores well below the average of OECD countries⁵. This is manifest in domestic abuse.

7. Housing affordability has become a crisis: in 2017/18, the proportion of lower income households spending more than 30% of their gross weekly income on housing costs was 56.9% of those renting from a private landlord, and 41.3% of owners with a mortgage. And for those wishing to escape domestic abuse, crisis accommodation services are inadequate. In 2019, more than 1 in 2 women were turned away from crisis accommodation every night.

⁴ Scott Morrison quoted in Amy Remeikis, "No better place to raise kids": Scott Morrison's new year message to a burning Australia", The Guardian, 1 January 2020, accessible at https://www.theguardian.com/australia-news/2020/jan/01/no-better-place-to-raise-kids-scott-morrison-new-year-message-burning-australia?CMP=Share_iOSApp_Other

⁵ UNICEF, "Child poverty in perspective: An overview of wellbeing in rich countries", 2007, accessible at <https://www.unicef.org/media/files/ChildPovertyReport.pdf>

8. **Aged care is in crisis** and in 2021 over 100,000 Australians in need are unable to obtain home care packages.

9. **The equality of Australians is faltering on multiple fronts** including:

- gender equality,
- sharing of national income and wealth between rich and poor,
- equality before the law, and
- equality of Indigenous Australians under the Constitution.

Australia's failures in Indigenous recognition and reconciliation are standing in the way of our ability to define ourselves as a nation and state what decency means for us.

10. Finally, Australians are increasingly fearful for their own safety and unhappy with their own lives, their prospects for the future, and the direction of the country as a whole.

If Australians want to see a better report card on the state of our society in the next few years, it will be necessary to work towards **an inclusive society with a new emphasis on equality** including:

- achieving gender equality;
- closing the gap for Indigenous Australians and enshrining their equality in the Constitution;
- promoting racial equality and appreciation of difference, including difference in sexual preference – reversing the recent decline in tolerance and in appreciation of diversity and multiculturalism as the basis of Australia’s success;
- reducing income and wealth inequality; and
- providing equality before the law for all Australians, including restoration of rights to open trial and the pre-eminent rights of children in detention and in family court disputes.

This inclusive society of equals is vital to Australia’s economic security – a fact made plain by economists, scientists, universities and business leaders in the Australian National Outlook 2019⁶ led by the National Australia Bank and the CSIRO. In their considered expertise, realisation of our most optimistic predictions for our economy depends heavily on our maintaining highly inclusive societies, economic institutions and markets. Conversely, a divided society that is unappreciative of diversity will make the most pessimistic economic scenario a reality. Excluding diverse talents will make for a fragile economy, not a resilient one capable of carrying more of us to prosperity.

For more information on the context for Targets and Strategies included in **Australia Together for Our Society**, view [The State of Australia in 2020](#) on [YouTube](#).

Further decline in tolerance of diversity will lead to a decline in inclusion and equality which will then lead to a loss of the full use of our human capital which will then result in slower economic growth or contraction.

The best economic future relies on ...

“ *Inclusive institutions which encourage people to participate in a choice of vocations that make best use of their skills, create opportunities for all, regardless of social and economic status at birth, and improve living standards while fairly sharing the benefits of increased prosperity.* ”

National Australia Bank & CSIRO

Detailed context for the Targets, Indicators & Strategies in **Our Society can be found in *The State of Australia in 2020* – especially Episodes 2, 5 and 7.**

[Click here for The State of Australia video playlist](#)

The following Targets, Indicators and Strategies for **our society** are derived consistent with the primary objectives of building an Australian society that:

- is inclusive and appreciative of diversity;
- resolves racial and religious conflicts and creates equal rights for all, including First Nations;
- reinstates the fair go for all as a genuine possibility; and
- as per the **Vision for Australia Together**:
 - maximises the safety of all Australians in their homes, in their public spaces, in the workplace and in the international sphere;
 - provides for the physical and mental health and wellbeing of everyone throughout their lives;

⁶ CSIRO & National Australia Bank, “Australian National Outlook 2019”, <https://www.csiro.au/en/Showcase/ANO>

- provides each and every Australian with unlimited opportunity to realise their full potential in life through education and employment of choice.

With the Targets and Strategies that are crafted here consistent with those primary objectives, the overarching intention or desired outcome is that Australia will move in the following Directions:

**In our society
Australia will
become:**

- A safe home
- A land with an Indigenous heart
- Inclusive, welcoming & enabling
- A place of optimal health and wellbeing
- A model of educational opportunity
- A society of equals
- A success because of its diversity
- A success because of gender equality
- A land without homelessness and with decent affordable housing for all
- A place of supportive familial & other connections & without domestic abuse
- A land without child disadvantage
- A sure provider of lifelong dignity
- A wellspring of inspiration & creativity
- A model of community service & responsible exercise of authority in policing
- Confident of justice for all
- A society prepared and resilient in times of disaster

Targets and Strategies will also contribute positively to multiple other Directions in ***Australia Together***, as displayed.

Society 1 – Safety

Targets, Indicators & Strategies for the success of Our Society		
Society 1 – Safety		
Targets, Indicators & Strategies for successful performance	In the Directions of becoming ...	Baseline data
Safety in the home Soc01.01 The percentage of people who feel safe when at home alone after dark meets or exceeds 95%.	Soc 1 A safe home.	In 2016, 90.4% of Australians reported feeling safe when at home after dark. Source: ABS 4906.0 Table 39.1 2016
Safety on transport Soc01.02 The percentage of people who feel safe when waiting for public transport alone after dark meets or exceeds 50%.	Soc 1 A safe home.	In 2016, 26.8% of Australians reported feeling safe when waiting for public transport alone after dark. Source: ABS 4906.0 Table 39.1 2016
Homicide Soc01.03 The rate of homicide declines continuously.	Soc 1 A safe home.	In 2018, the rate of homicides per 100,000 of population was 1.5 (declining continuously from 2.1 since 2010). Source: ABS 4510.1, Table 1 2018
Sexual assault Soc01.04 The rate of sexual assault declines continuously.	Soc 1 A safe home.	In 2018, the rate of sexual assaults per 100,000 of population was 105.3 (rising continuously from 85.6 since 2010). Source: ABS 4510.1, Table 1 2018
Child assault Soc01.05 The rate of child assault declines continuously.	Soc 1 A safe home.	In 2016/17, there were 611 hospitalisations of children aged 0–14 for injuries due to abuse (which includes assault, maltreatment and neglect), including 156 Indigenous children. For the 481 (79%) of hospitalisations where the perpetrator was specified, nearly 1 in 2 (45%, or 217) children were abused by a parent, and 1 in 8 (13%, or 71) by another family member. For Indigenous children, about 2 in 3 (68%, or 83) were abused by a parent or family member. Source: AIHW, "Family, domestic and sexual violence in Australia: Continuing the national story, 2019
	Soc 10 A place of supportive familial & other connections & without domestic abuse.	
	Soc 11 A land without child disadvantage.	
Road deaths Soc01.06 The number of road deaths declines continuously.	Soc 1 A safe home.	In 2019 there were 1,178 fatalities on Australian roads. Source: BITRE Road Safety Statistics
Victims of crime Soc01.07 The proportion of Australians worried about becoming a	Soc 1 A safe home.	In 2017, 35% of Australians worried about becoming a victim of crime in their own area, up from 25% in 2009.

	Soc 3 Inclusive, welcoming & enabling.	
	Soc 4 A place of optimal health and wellbeing.	
	Soc 6 A society of equals.	
	Soc 7 A success because of its diversity.	
	Soc 15 Confident of justice for all.	
	Gov 2 A nation knowing and affirming decency.	
	Gov 3 A nation with avowed rights for all.	
	Gov 4 A free, self-governing, modern nation.	

Note regarding the following targets and Indicators for Society 2 – Indigenous Heart:

The draft Targets and Indicators shown below derive from various “Closing the Gap” reports for Indigenous Australians and related sources of data such as the Australian Institute of Health and Welfare (AIHW).

While Australian Community Futures Planning does not dispute the baseline data derived from these sources, there is some concern with the Targets for elimination of Indigenous disadvantage that have been derived directly from the Closing the Gap in Partnership Agreement 2020⁷ struck between the Coalition of Aboriginal and Torres Strait Islander Peak Organisations and the various governments of Australia.

Taken at nominal value, some of the Targets adopted under the Closing the Gap in Partnership Agreement would not actually result in the gap being closed inside a century. Such targets have no utility in a long term plan like **Australia Together** and offer little or no advantage to Indigenous Australians. Accordingly in some cases, ACFP has suggested additional Targets which are more ambitious than those adopted in the Closing the Gap in Partnership Agreement. These additional Targets are denoted as “ACFP additional Target”.

Progress towards or away from both sets of Targets will be monitored and reported on.

Targets, Indicators & Strategies for the success of Our Society		
Society 2 – Indigenous Heart		
Targets, Indicators & Strategies for successful performance	In the Directions of becoming ...	Baseline data
Indigenous – Life expectancy Soc02.02 Close the gap in life expectancy rates between Indigenous and non-Indigenous Australians within a generation by 2031 (as per adopted COAG target 2008, unchanged in Closing the Gap in Partnership 2020).	Soc 2 A land with an Indigenous heart.	For the Aboriginal and Torres Strait Islander population born in 2015–2017, life expectancy was estimated to be 8.6 years lower than that of the non-Indigenous population for males (71.6 years compared with 80.2) and 7.8 years for females (75.6 years compared with 83.4). Happiness & wellbeing – optimism/pessimism Soc04.06.02 The proportion of Australians who are optimistic about their future "overall" does not decline.	Soc 4 A place of optimal health and wellbeing.	In 2021, during the Covid-19 pandemic, 80% of Australians said that "overall" they were optimistic or very optimistic about their future, up from 78% in the pre-Covid period. Source: Source: ABC Australia Talks National Survey 2021
Health funding Soc04.07 By 2026, ensure that the health costs of Australians are securely funded by a legislated floor in expenditure as a proportion of GDP – a floor which ramps up federal health funding from its baseline of 4.27% of GDP in 2018/19 to at least 7% of GDP by 2055, unless fully transparent comprehensive investigations result in revisions of projected costs. These revisions should occur every five years with a legislative obligation to adjust budgeted funding to ensure full coverage of expected costs.	Soc 4 A place of optimal health and wellbeing.	In 2018/19, federal government total expenditure on health including medical services and benefits, pharmaceutical benefits, assistance to states for public hospitals, and other health items was 4.27% of GDP and was expected to rise, but not to a level sufficient to cover expected increases in costs and demand.
	Soc 6 A society of equals.	In the "2015 Intergenerational Report – Australia in 2055" the federal Treasurer noted that while the Australian Government was spending 4.2% of the nation's GDP on health and would expect that to rise to 5.5% in 2055, the real expected spending level that will be a necessity by 2055 on our health is 7.1% of GDP. Subsequent federal budget papers have made no commitment to establish funding sufficient to meet expected demand.

Chapter 6 – Targets, Indicators & Strategies for Success in Our Environment

Brief context for the Targets, Indicators & Strategies for Our Environment

At the outset of the 2020s Australia, along with the rest of the world, is heading towards climate and biodiversity catastrophe and in terms of performance against global aims is leading in the destruction of ecosystems. If this is not reversed, it will destroy Australia's economy.

Australia's scores in the independent international Climate Change Performance Index (CCPI)⁸ indicate that **Australia, despite all its wealth, expertise and investment capacity, has played an uncooperative role compared to other nations**, particularly on development and implementation of a sustainable climate change policy.

This uncooperative stance on climate change, combined with a persistent failure to protect Australia's unique biodiversity, is the single biggest threat to the nation's future prosperity and economic strength, as the University of Melbourne has made clear in research about the cost of the world's current trajectory of carbon emissions reduction⁹. In 2020, researchers were able to quantify these potential losses to Australia at \$584 billion by 2030 and \$762 billion by 2050 – amounts which dwarf (but add to) the debt taken on by Australia for Covid-19 of just over \$300 billion.

For as long as Australia refuses to take a leadership role in climate change prevention on the international stage, Australia's economy is poised for disaster.

⁸ The Climate Change Performance Index (CCPI) has been produced annually since 2005 by Germanwatch, the NewClimate Institute and the Climate Action Network and is supported by contributions from around 350 climate experts. The CCPI is an independent monitoring tool for tracking countries' climate protection performance. <https://ccpi.org/download/the-climate-change-performance-index-2021/>

⁹ University of Melbourne, Melbourne Sustainable Society Institute, "Australia's Clean Economy Future: Costs and Benefits", June 2019, <https://sustainable.unimelb.edu.au/publications/issues-papers/australias-clean-economy>

A similar impact on Australia's economy is likely to result from ecosystem and biodiversity loss.

Since colonisation, Australia has suffered extensive biodiversity loss¹⁰.

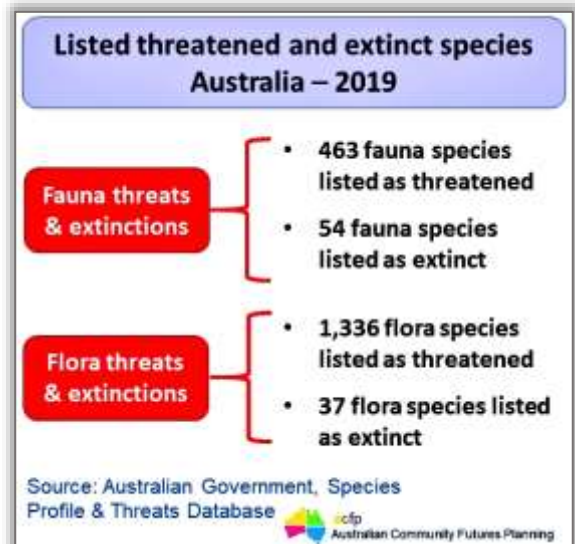

And the rate of decline in biodiversity is accelerating¹¹.

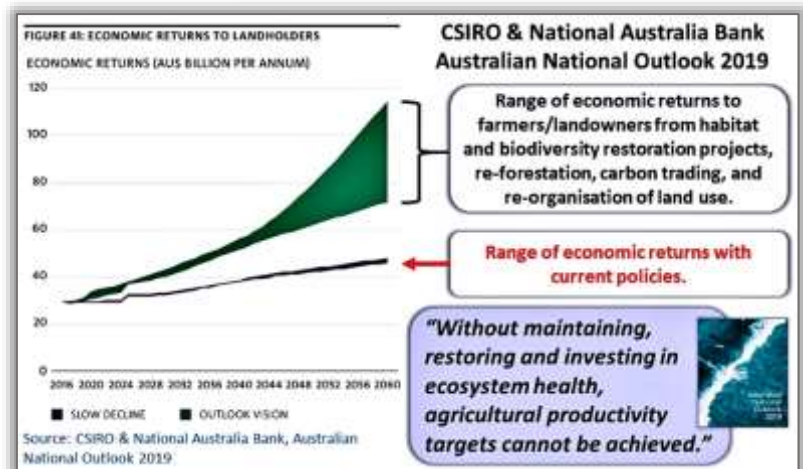

In addition to recorded species loss, it is estimated by Queensland and La Trobe Universities that at least another 49 species should be listed as threatened due to the 2019/20 bushfires in south east Australia.

Source: Queensland & La Trobe Universities, Michelle Ward, et al, Journal of Nature Ecology & Evolution, July 2020

Despite the vital economic importance of attending to climate change and rescuing ecosystems, **policy settings in 2020 are on track to destroy the natural advantage that Australia's wide biodiversity provides for agricultural yields and returns on investment for farmers and landowners.** Australia is losing hundreds of billions of dollars because of its environmental policies.

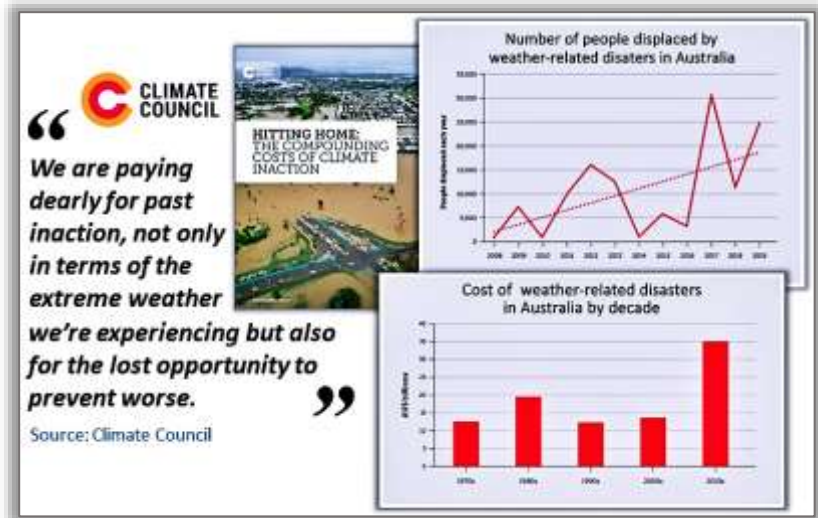

¹⁰ See Australian Bureau of Statistics, “Australia's Biodiversity” web page, <https://www.abs.gov.au/ausstats/abs@.nsf/Previousproducts/1301.0Feature%20Article12009%E2%80%939310?opendocument&tabn>

¹¹ Commonwealth of Australia, State of the Environment Report 2016, <https://soe.environment.gov.au/theme/biodiversity>

Beyond mere economic considerations, **Australia has also been exposed over the decade to 2020 to serious risk of loss of life and public safety due to its poor performance and lack of cooperation on both policies to prevent climate change and actions to reduce carbon emissions to levels sufficient to cap global heating at 1.5° Celsius above pre-industrial revolution levels.**

- In policy, **Australia has destroyed its carbon pricing system** and this has prevented entry to the international carbon trading system, which has in turn prevented Australia from earning substantial national income – income necessary to make climate change adaptation affordable.

- In emissions reduction, despite having one of the world's higher uptakes of solar energy, **nothing has been achieved in terms of net reduction of emissions**, due to Australia's persistence in use and export of fossil fuels. Nor with current policies is Australia likely to reduce emissions to anywhere near the level necessary to prevent heating. Australia has adopted targets for reduction of emissions by 2030 (26-28% below the tonnages emitted in 2005) which are wholly inadequate for stopping temperature increases and which the country is not on track to meet anyway.

Because Australia has left its run so late to begin reducing emissions, the annual reductions required to ensure that Australia at least does the minimum necessary in cooperation with other countries to cap temperature increases at 1.5° Celsius will now need to be much higher and faster than they would have been if we had started reducing emissions in 2000. **At the outset of the 2020s, Australia has arrived at a point where failure to meet ambitious emissions reduction targets will make climate change adaptation unaffordable for future generations.**

But unaffordable bills and lifestyle devastation can still be avoided if Australia reaches net zero emissions before 2035.

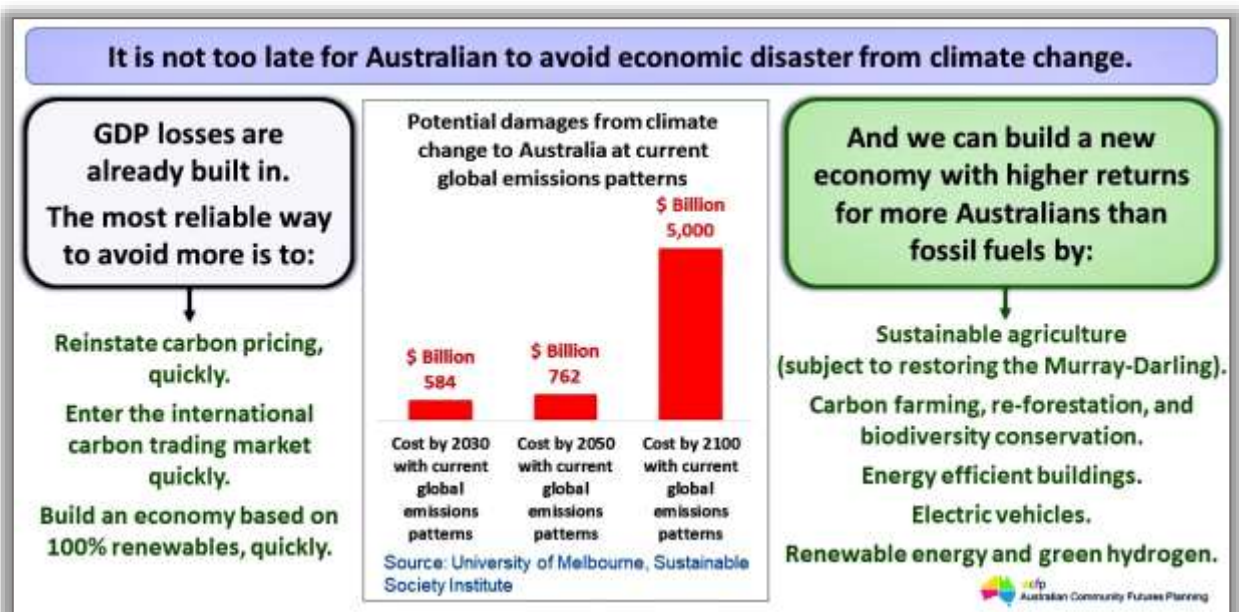

The reality for Australia in the 2020s is that:

1. action to reduce carbon emissions,
2. biodiversity conservation, and
3. environmental renewal, particularly through re-forestation

are the biggest enablers of economic growth. But the necessary incentives are missing. The most effective incentive would be the re-introduction of a price on carbon (although that is by no means the only necessary policy change). **If a carbon price**

were to be reintroduced it would be possible for those Australians working on the land to make far more money from planting a tree than they can from cutting one down. And Australia as a nation could make far more money from leaving coal and gas in the ground than from digging them up. This will not suit the fossil fuel industry but it will suit the nation financially. Moreover, transition plans for those working in dying industries such as coal mining can be financed because excellent prices can already be commanded in international markets for credits traded for any carbon we might store instead of release to the atmosphere. These prices will improve at least for the decades out to 2050. But **for as long as Australian policy makers refuse to put a price on carbon, we will simply miss out on the income from this market and we will continue to deplete the resource renewal potential that our extraordinarily wide biodiversity provides for us.**

If Australians want to see a better report card on the state of our environment and economy in the next few years, it will be necessary to reverse the policy settings for regional planning and economic measures that have become entrenched in the decade to 2020.

For more information on the context for Targets and Strategies included in **Australia Together** for **Our Environment**, view [The State of Australia in 2020](#) on [YouTube](#).

Detailed context for the Targets, Indicators & Strategies in **Our Environment** can be found in **The State of Australia in 2020 – Episode 6, Parts 1 and 2.**
[Click here for The State of Australia video playlist](#)

The following Targets, Indicators and Strategies for **our environment** are derived consistent with the primary objectives of building a nation that:

- is committed to securing the safety of both current and future generations of all Australians;
- is skilled in ethical fair sharing of intergenerational burden for planetary protection;
- is appreciative of its connection with and dependence on Australia's unique and magnificent biodiversity and climate; and
- as per the **Vision for Australia Together**, has the courage to take a leading place in achieving the environmental aims of a global society, recognising that Australia's success is dependent on being a decent international citizen.

With the Targets and Strategies that are crafted here consistent with those primary objectives, the overarching intention or desired outcome is that Australia will move in the following Directions:

**In our
environment
Australia will
become:**

- A leading global advocate for action on climate change
- A net zero emissions nation
- A proactive planner of climate change adaptation
- A nation that puts the environment before unsustainable consumption
- An environmentally educated community
- A renewable energy superpower
- Efficiently connected through low emissions transport
- Environmentally and economically sustainable in agriculture
- Confident of safety and security of its water supplies
- A biodiversity haven
- A replanted and reforested land
- A protector of scarce resources
- A provider of accessible national & urban parkland
- A pollution free biosphere
- A marine wildlife haven
- A producer of zero waste
- A conservator of cultural & built heritage
- Multi-central in its cities, efficiently connecting people with jobs, health, education and recreation
- A land of thriving self-supporting regions

Targets and Strategies will also contribute positively to multiple other Directions in **Australia Together**, as displayed.

Environment 1 – Environmental advocacy

Targets, Indicators & Strategies for successful performance	In the Directions of becoming ...	Baseline data
<p>Reformation of Australia's negotiating stance and conduct in Paris Agreement negotiations – Commitment to emitting no more than a fair share of a global carbon budget Env01.01</p> <p>By the 2021 COP26 meeting in Glasgow (or as soon as possible thereafter), recognising that:</p> <p>a) Australia has everything to lose (economically and in all other respects) by failing to support the UNFCCC negotiations to cap heating at 1.5° Celsius, and can gain more than any other nation by ensuring heating does not rise above that temperature, and that</p> <p>b) it is not possible to keep global heating below 1.5° Celsius without adoption of a global carbon budget and an agreement by all nations to emit no more than their fair shares of that budget, attend the COP26 meeting offering a new basis for the framework negotiations as follows:</p> <p>1. That negotiations within the Framework should be shifted away from pledges to reduce emissions by self-nominated percentages –</p>	Env 1	A leading global advocate for action on climate change.
	Env 2	A net zero emissions nation.
	Env 4	A nation that puts the environment before unsustainable consumption.
	Env 6	A renewable energy superpower.
	Env 7	Efficiently connected through low emissions transport.
	Env 8	Environmentally and economically sustainable in agriculture.
	Env 10	A biodiversity haven.
	Env 11	A replanted and reforested land.
	Env 14	A pollution free biosphere.
	Env 15	A marine wildlife haven.
	Env 19	A land of thriving self-supporting regions.
	Soc 1	A safe home.
	Soc 4	A place of optimal health and wellbeing.
	Soc 6	A society of equals.
	Econ 1	A model of transition from excessive consumption to sustainability.
		<p>In 2021, Australia's stance and conduct in relation to the Paris Agreement under the United Nations Framework Convention on Climate Change was to negotiate on the basis of offering percentage reductions in carbon emissions compared to a baseline year. In mid 2021, the reduction on offer from Australia was 26%-28% on 2005 emissions by 2030 and there was no commitment to meet net zero by 2050 or any other date. The percentage reductions on offer from Australia were not only among the weakest of any nation, they were also:</p> <ol style="list-style-type: none"> 1. embedding a global negotiation framework that will be wholly insufficient to ensure that temperatures can be capped at 1.5° Celsius; and 2. entirely at odds with the economic interests of Australia. <p>In 2019, the economic loss to Australia as a result of global temperature rises of more than 1.5° Celsius was estimated by Melbourne University's Sustainable Society Institute¹³ as a minimum of:</p>

¹³ University of Melbourne Sustainable Society Institute, "Australia's Clean Economy Future: Costs and Benefits", June 2019, page 3: "The potential damages from climate change to Australia at current global emissions patterns are quantified as: • \$584.5 billion in 2030 • \$762 billion in 2050 • more than \$5 trillion in cumulative damages from now until 2100. These costs are conservative – they exclude the bulk of costs of floods and bush fires, pollution, damage to environmental assets and biodiversity losses. Conversely, the national costs of effective emissions reduction – based on a carbon price or renewables target – are estimated at \$35.5 billion from 2019 to 2030, or 0.14% of cumulative GDP; a negligible impact. Overall, the costs of emissions reduction are far less than the damages of inaction – even with modelling underestimating damages from climate change and overestimating the costs of emissions reduction."

Chapter 7 – Targets, Indicators & Strategies for Success in Our Economy

Brief context for the Targets, Indicators & Strategies for Our Economy

At the outset of the 2020s Australia's economy has reached a major turning point. **After at least two decades under the increasing influence of neoliberalism in Australian economic policy, the economy is in a state of decline.** Neoliberal policy advocates have been asserting that our wellbeing arises exclusively from economic growth and that this growth can only arise from:

- less government,
- less taxation (especially for the rich and for corporations),
- less public ownership or operation of assets and services,
- less welfare, and
- less regulation of markets and the natural environment.

But from the end of the mining boom in 2012, growth in GDP, GDP per capita, productivity and private sector investment all slowed (or fell) in Australia, particularly from 2014 onwards with the election of a conservative federal government that intensified neoliberal policy implementation. This contractionary trend was accompanied by a growth in underemployment (employed persons seeking more hours) and underutilisation of the willing labour force, meaning the economy fell into

operating significantly below its productive capacity. **In December 2019, there were almost 400,000 more underemployed people in Australia than in December 2008 and unemployment was still 1% higher than it was in 2008.** This aggravated already embedded growth in inequality, poverty, hunger, homelessness, family insecurity and breakdown, other types of social disadvantage and environmental degradation such as species loss, water insecurity and climate change.

At the same time, **the Australian economy has been verging towards the end of the period of usefulness of its current structure.** It is on the cusp of a transition away from being heavily dependent on mining commodities and toward increased dependency on services – particularly health, welfare, education and aged care – and renewable energy. The opportunities are enormous, but **the necessary transition has a long way to go and is being stalled by a range of neoliberal policy settings** including policies which:

Neoliberal policies are restricting taxpayer involvement in and returns from their own economy and stalling the necessary transformation of the economy.

- artificially cap taxpayer involvement in and direct returns from their own economy (through mechanisms such as the tax-to-GDP cap and other anti-competitive policies militating against public sector contributions to economic growth);
- cap wage growth and reduce workplace conditions, which in turn crushes consumer spending and lowers the standard of living for everyone, not just the most vulnerable;
- cap welfare which, in addition to crushing consumer spending, constrains circulation and growth in the area of the economy with the biggest capacity for jobs growth – the services sector (health, welfare, education, aged care);
- sell off public assets and services usually for less than their value which results in price rises and increased risk, particularly environmental risk, for taxpayers; and
- refuse to price carbon so that Australians can boost economic growth and cut the cost of climate change by trading in carbon permits.

In summary, at the outset of the 2020s **the fundamentals of the economy are very weak and policy settings are running 180 degrees in the wrong direction** for an economy where:

- coal mining and other exports are in decline;
- productivity has stalled;
- private sector investment has stalled;
- poverty is on the rise;
- consumer demand and spending power are in decline;
- environmental resources are being consumed faster than they can be renewed;
- climate and energy policies are non-existent; and
- there is no capacity to reduce interest rates to help the economy along.

The Australian economy has reached the end of the period of usefulness of its current structure. Heavy dependence on fossil fuels, taxpayer subsidies and private sector ownership and operation of services will no longer suffice as growth generators.

The coronavirus pandemic has aggravated the situation. If Australians want to see a better report card on the state of our economy in the next few years, a complete reversal of prevailing neoliberal policies in multiple areas is required particularly in:

- taxation,
- distribution of shares of wealth,
- welfare,
- aged care,
- government investment,
- government employment,
- labour relations,
- carbon emissions and pricing,
- energy,

- land use,
- social housing,
- education,
- fair market regulation, and
- competition policy.

Effectively, Australians have two main menus to choose from. We can choose to keep doing what we have been doing under neoliberalism – a strategy which has been proven to reduce GDP and increase inequality. Or we can shape strategies to increase GDP and reduce inequality. Further background about the menus that we can choose from can be found in [Episode 5 of The State of Australia in 2020](#) and in Chapter 8 of [By 2050](#).

The following Targets, Indicators and Strategies for **our economy** are derived consistent with the primary objectives of:

1. achieving steady economic growth but, more importantly, reducing inequality so that Australians share fairly in the wealth they work hard to create;
2. re-structuring Australia's economy so that it is competitive in a 21st century globalised world; and
3. as per the **Vision for Australia Together** ensuring that:
 - everyone can realise their full potential in life, as individuals, members of a family and citizens through unlimited opportunities in education and employment of choice,
 - vital services are fully accessible,
 - scarce resources are conserved and fairly shared, and
 - our economy is sustainable and supports rewarding opportunities and continuous improvements in living standards for everyone.

With the Targets and Strategies that are crafted here consistent with those primary objectives, the overarching intention or desired outcome is that Australia will move in the following Directions:

**In our
economy
Australia will
become:**

- A model of transition from excessive consumption to sustainability
- A model of employment planning & justice in industry transition
- A country where economic opportunity, growth & prosperity are equitably shared & living standards improve continuously for all
- A nation fairly raising and sharing its wealth
- A strong regulator of fairness in markets creating confidence for investors
- An economy with competitive & profitable public participation
- A collaborative intelligent nation
- Enabled in meeting the communication & information demands of the future
- Productive and prosperous through fair trade agreements

Targets and Strategies will also contribute positively to multiple other Directions in **Australia Together**, as displayed.

	Econ 4 A nation fairly raising and sharing its wealth.	
Growth measures/targets – GDP growth Econ01.03 Growth in Gross Domestic Product (GDP) does not fall below 2.4% per annum	Econ 1 A model of transition from excessive consumption to sustainability.	Between 1972 and 2014, growth in GDP averaged 3.1% per annum. Between 2015 and 2019, growth in GDP averaged only 2.4% per annum. Source: ABS 5206.0, Table 1

Targets, Indicators & Strategies for the success of Our Economy

Economy 1 – Economic planning, growth & transition

Targets, Indicators & Strategies for successful performance	In the Directions of becoming ...	Baseline data
measured over rolling 3-year periods. ¹⁵		
Growth measures/targets – GDP growth Econ01.03.01 Growth in GDP per capita returns to its pre GFC average of at least 2.2% over rolling 3-year periods.	Econ 1 A model of transition from excessive consumption to sustainability.	Between 1984 and 2007 (before the GFC) growth in GDP per capita averaged 2.2% per annum. Between 2009 and 2013 (post-GFC) growth in GDP per capita fell to an average of 1.3% per annum. Between 2014 and 2019, growth in GDP per capita fell further to an average 0.8% per annum. Source: ABS 5206.0
Government investment for sustainable economic growth Econ01.04 By 2023, recognising that declines in government sector spending per capita lead to unnecessarily reduced economic growth in areas where sustainable growth is possible, reverse the reductions in government spending per capita and establish, by legislation, a floor increase in government sector budgeted spending per capita of 4% per annum until such time as GDP growth rises once again above 3% per annum or full employment is reached (as per Econ02.02). Legislate to repeat the strategy whenever GDP drops below 2.4% and implement in tandem with policies listed under Econ04.02.01 .	Econ 1 A model of transition from excessive consumption to sustainability.	Between 1992 and 2012, federal government spending per capita increased by an average of 2.6% per annum and Australia's economy grew by an average of 3.4% per annum. By contrast, between 2013 and 2018 federal government spending decreased annually by an average of 0.2% and Australia experienced markedly slower economic growth of 2.5% per annum on average and slowed to 1.7% in 2018/19. Source: Parliamentary Budget Office 2019/20 Medium Term Budget Report & ABS 5206.0
	Econ 2 A model of employment planning & justice in industry transition.	
	Econ 3 A country where economic opportunity, growth & prosperity are equitably shared & living standards improve continuously for all.	
	Econ 4 A nation fairly raising and sharing its wealth.	
	Econ 6 An economy with competitive & profitable public participation.	

¹⁵ **Rationale for the target selected for growth in Gross Domestic Product (GDP).** Growth in GDP is used as the typical expression of performance in meeting the desire of Australians for a strong economy. However, GDP growth is not a useful measure of socioeconomic strength and, of itself, is not especially useful for long term planning purposes when the preferable and more practical objective is not primarily GDP growth *per se* but improved distribution of the benefits of sustainable growth – in other words, how is the growth generated and who is it for? Nor does growth in GDP shed light as a measure on the harm caused to achieve growth, harm which may exceed the benefits of the growth. While GDP growth may be highly desirable, there is more chance of achieving that growth if targets are established for policies and activities likely to stimulate fairer sharing of the benefits of growth (such as reduction in inequality, increases in private and public sector new capital investment, increases in public sector services, increases in labour productivity, and reductions in underemployment and duration of unemployment). Nevertheless, monitoring growth in GDP does provide a useful benchmark for measurement of the shares of that growth that are returned to the community in wages growth. Targets and Indicators in this and other chapters have been selected on the premise that policies which combat inequality and stimulate investment by both the public and private sector will provide the surest path to higher growth in GDP. For information on the rationale for this, see [By 2050: Planning a Better Future for Our Children in 21st century democratic Australia](#), Chapter 7.

Targets, Indicators & Strategies for the success of Our Economy

Economy 1 – Economic planning, growth & transition

Targets, Indicators & Strategies for successful performance	In the Directions of becoming ...	Baseline data
Economic composition and transformations – Services sector expansion Econ01.05 Australia's services sector expands progressively particularly in health, welfare, and education.	Econ 1 A model of transition from excessive consumption to sustainability.	In 2020, the health & education sector produced 13% of Australia's total output, making it the largest sector of the economy and the largest employer. Targets, Indicators & Strategies for the success of Our Economy

Economy 2 – Employment planning & industry transition

Targets, Indicators & Strategies for successful performance	In the Directions of becoming ...		Baseline data
Average weekly hours worked by casual employees declines relative to non-casual employees and the length of time taken to transition from casual to permanent employment falls continuously.	Econ	3	A country where economic opportunity, growth & prosperity are equitably shared & living standards improve continuously for all.
	Econ	4	A nation fairly raising and sharing its wealth.
	Econ	5	A strong regulator of fairness in markets creating confidence for investors.
	Econ	6	An economy with competitive & profitable public participation.
	Soc	3	Inclusive, welcoming & enabling.
	Soc	6	A society of equals.
	Soc	7	A success because of its diversity.
	Soc	8	A success because of gender equality.
	Gov	9	A nation outlawing corporate greed & encouraging private sector ethics & community partnership.
Employment planning Top Priority Target/Strategy: National plan for full employment supported by a social wage Econ02.04 By 2022, in association with processes for development of an Accord on Wealth, Welfare and Wellbeing (see Econ04.02), the federal government convenes a process of joint development of a draft plan to re-structure the competitive mix of industries and labour market policies supporting Australia's economy to achieve full employment by 2025 (where full employment is defined consistent with Econ02.02).	Econ	2	A model of employment planning & justice in industry transition.
	Econ	1	A model of transition from excessive consumption to sustainability.
	Econ	3	A country where economic opportunity, growth & prosperity are equitably shared & living standards improve continuously for all.
	Econ	4	A nation fairly raising and sharing its wealth.
			up from 21.2 in 2001-2004. By contrast the average weekly hours worked by other (non-casual) employees was 38.6, down from 40.2 in 2001-2004. The trend was towards increasing casualisation of Australia's workforce. The length of time in casual work before transitioning to permanent work has also increased. Between 2001 and 2004, 41.5% of casual workers would be in a permanent job within four years. Between 2015 and 2018, this dropped to 35.9%. Source: Household, Income and Labour Dynamics in Australia (HILDA) Survey 2021, Tables 4.7 and 4.10
			In 2020, Australians had no guarantee of decent productive employment and they were facing the ongoing removal of social safety nets and rights to a decent basic income throughout their lives. Before any further erosion of benefits and access to social support, and in anticipation of transitional issues associated with robotization and artificial intelligence, a plan for industry transition and labour market negotiation is required, in parallel and consistent with an Accord on Wealth, Welfare and Wellbeing and in order to meet commitments made under UN Sustainable Development Goals adopted in 2015 by Australia.

¹⁷ Professor Garnaut's rationale for an "Australian Income Security (AIS)" was that it would be an essential part of a wider set of strategies to support a return to full employment, which in turn is central to the restoration of the Australian economy: "Ways have to be found to raise the incomes of workers on low wages without increasing costs of labour to employers. This leads us to a minimum basic income, which can be augmented by earnings from employment which are taxed at a moderate rate." (*Reset*, page 185). The logic of the strategy is that the cost to the federal budget of the fiscal stimulus from the AIS in the first few years would be offset after full employment was reached, providing an increase in total tax receipts from higher employment rates. The proposal, however, is built on a view that stimulus for the private sector and competitiveness in trade exposed industries is the best way to restore the economy. This potentially disregards the value of expanded government services in health, education and welfare to GDP growth and to the extent that an AIS may remove funds for essential services for a number of years, it may be self-defeating. Community engagement on an Accord on Wealth, Welfare and Wellbeing as per **Econ04.02** is thus an essential prerequisite to this otherwise valuable proposal.

testing operation of the Commission and developing an appropriately independent charter.			
Economic transition funding to drive sector-wide transformations with safety nets – Coal industry closure Econ02.05.01 Regardless of whether the National Economic Transitions Commission is established under Econ02.05 and utilising a small portion of the savings to taxpayers that can be anticipated from the elimination of fossil fuel subsidies under Env02.03 , establish a one-off \$1 billion redundancy and redeployment fund for employees of thermal coal mining and coal-fired power companies who are facing displacement, accessible until 2025 (and no later). Payments from the fund should reflect years of service, plus transition costs associated with re-training and relocation, and be in addition to all other termination entitlements under agreements with private employers. Note: Payment from the fund would not be applicable to workers who take up employment in thermal coal mining or coal fired power stations after creation of the fund and no worker receiving payments for redundancy and redeployment could be permitted to work in the coal sector in the future, recognising that the taxpayer funded transition program is to support transition to a sustainable economy, not a revolving door and additional subsidy to the coal industry.	Econ 2	A model of employment planning & justice in industry transition.	In 2015, the International Monetary Fund estimated that the size of subsidy provided by Australian taxpayers to the fossil fuel industry was AU\$42 billion approximately or 2.3% of GDP (US\$29 billion) and AU\$1,700 per capita approximately per annum. This equates to setting aside the equivalent of \$730,000 of taxpayer funded subsidy each year for each person employed in coal mining and oil and gas exploration and production in Australia. The Australian taxpayer receives no share of the profits in return for its subsidisation of the fossil fuel industry. Profits are largely off-shored. Nor does the fossil fuel industry contribute to clean-up costs or climate change adaptation costs. Creation of a fund to make coal workers redundant and transfer them to sustainable industries (including other types of mining) would equate to a massive saving for Australia. If implemented in addition to a carbon price it would make transition to net zero and a new economy affordable for Australia. Source: International Monetary Fund “IMF Working Paper: Global Fossil Fuel Subsidies Remain Large: An Update Based on Country-Level Estimates, WP/19/89”, 2019 In 2019, approximately 38,400 people were employed in coal mining in Australia, a reduction from 47,500 in 2014. By 2030 it may be expected that the thermal coal industry will be non-existent due to multiple

²¹ For a history of Competition Policy in Australia, see Parliament of Australia, Australia’s National Competition Policy at https://www.aph.gov.au/About_Parliament/Parliamentary_Departments/Parliamentary_Library/Publications_Archive/archive/ncpebrief

²² The objective of the reforms was to: prevent anti-competitive conduct by any business, government or private; introduce competitive neutrality principles restricting governments from gaining business advantages (in business of a certain size) merely by being government owned (and eg., by not having to pay tax); prevent mergers and acquisitions that are contrary to the public interest; and provide access to monopoly infrastructure on fair and equitable terms.

²³ See Competition Policy Review Final Report March 2015 (the Harper Report), page 255: “The [competitive neutrality principles in national competition] policies require government business activities to charge prices that fully reflect costs and to compete on the same footing as private sector businesses in terms of taxation, debt, regulation and earning a commercial rate of return.” The implicit assumption was that fair price competition between public and private sector would result in price advantages for the consumer but the principle actually made price rises inevitable for consumers of services where large GTE’s are competing with the private sector. https://treasury.gov.au/sites/default/files/2019-03/Competition-policy-review-report_online.pdf

Chapter 8 – Targets, Indicators & Strategies for Success in Our Governance

Brief context for the Targets, Indicators & Strategies for Our Governance

At the outset of the 2020s Australians are quite dissatisfied with their democracy and voter turnout at elections is dropping. Voter turnout, however, is not a great indicator of the strength of a democracy and the shares of power that individual Australians can assert. Better indicators include:

- our levels of political activism,
- freedom of expression and of access to information,
- our sense of justice and equity, and
- our perception of the ethical standards and conduct of leaders, both elected and corporate.

In 2021, Australia's democracy could be deemed healthy only on the basis of the first of these indicators. Since 2009, according to the Scanlon Index of Social Cohesion²⁵, political activism within our democracy has risen each time we have perceived a drop in social justice and equity, indicating that, **among Australians, there is still a fairly healthy sense of the value of participation in democracy, including in political campaigns.**

On all the other indicators, however, particularly in perceptions of corruption, the health of Australia's democracy has declined, as can be seen in the drop in scores for public sector/government corruption in Transparency International's Corruption Perceptions Index²⁶. Worldwide, only 22 out of 180 countries have made progress in decreasing corruption since 2012 and 137 countries have made no progress at all. **Australia is one of 21 countries that have shown significant declines in their scores on the Corruption Perceptions Index.** In fact, Australia's score declined so significantly that it is now 10 points lower than countries like New Zealand and Denmark. We used to be ranked in the "very clean" category, but that no longer applies.

²⁵ See "Mapping Social Cohesion 2019, The Scanlon Foundation Surveys", <https://scanloninstitute.org.au/sites/default/files/2019-11/Mapping%20Social%20Cohesion%202019.pdf>

²⁶ See Transparency International, Corruption Perceptions Index at <https://www.transparency.org/en/cpi/2019/index/nz> and on Wikipedia at https://en.wikipedia.org/wiki/Corruption_Perceptions_Index

After two decades of national security legislation that has had the effect of removing numerous civil, political and human rights for Australians²⁷ it is apparent that in the 2020s the fundamentals of Australia's democracy and governance are weak, not strong. Much of this weakness can be attributed to the fact that **our Constitution is outdated and is silent on what Australians value**. It is:

- silent on what we stand for as a nation,
- silent on the rights and even existence of First Nations, and
- silent on almost all our human rights, effectively conferring no rights on Australians other than freedom of religion.

Australia's Constitution is the product of 19th century thinking for a distant land. It is singularly ill-suited for a 21st century Australian democracy.

Being so silent, the Constitution also exposes Australians to a heightened risk of being led into wars with countries that do not threaten Australia's sovereignty and which have nothing at all to do with protecting what we genuinely value (such as the Iraq War). The combination of:

1. the Constitution's silence on national values;
2. the attenuation of rights for Australians under ever-tightening national security legislation (particularly rights to information vital to the public interest and the right to fair and open trial),
3. the rise of a poisonous discourse in government policy in favour of hawkishness and against international cooperation and humanitarian global citizenship, and
4. the failure to develop soft power through ethical diplomacy and sensible strategy

has made Australia much less secure and more exposed to economic sanctions than is necessary. It is a deadly combination and one which cannot assist Australia to deal with the geopolitical and economic shift that will surely dominate our 21st century evolution as a nation – the rise of China. For more information on Australia's unnecessary exposure to risk through the lack of a strategy on China, see [The State of Australia in 2020 Episode 4 Part 2 on Fractious International Relations](#).

Australia is unprepared for the inevitable geopolitical and economic shift that will dominate the 21st century. We have no plan for dealing with the rise of China.

Most notably in terms of weaknesses, **the Australian Constitution acknowledges and provides for "the people" but only insofar as they may elect representatives, not insofar as they might play a more influential role in a participatory democracy**. It entrenches 21st century Australians in a reactive or passive role in their own democracy rather than the proactive role that is entirely necessary for achievement of an inclusive society of equals. In providing for a 19th century style representative democracy, the Constitution severely limits the shares of power for individual Australians and the right of self-determination, the realisation of which Australia is bound to promote under Article 1 of the International Covenant on Civil and Political Rights²⁸.

In summary, Australia's Constitution does little more than transfer all power from the many to the few without specifying what such power may be used for and to what ends. **Australians have organised their democracy without providing guidance to any government about their preferred direction for our country.**

²⁷ For a detailed list of rights lost under various types of legislation since 2002, see [Chapter 8 of By 2050](#), Ibid.

²⁸ Australia is a signatory to the International Covenant on Civil and Political Rights, <https://www.ohchr.org/en/professionalinterest/pages/ccpr.aspx>

If Australians want to see a better report card on the state of our democracy and our faith in it in the next few years, it will be necessary to augment the more reactive and/or passive roles we have taken to date with more organised communications about what we want for the long term. **Specifically it will be necessary to organise the introduction of an extra step in our democratic process.** That extra step is open community engagement in the process of preparing a national integrated community futures plan. From there it will be necessary to monitor progress against the plan and report on movement towards or away from its Vision for the long term. For more information on this necessary extra step in democracy, view [The State of Australia in 2020, Episodes 3 and 7](#).

Australians can increase their shares of power by inserting an extra step in their democratic process.

They can develop their own national integrated long term plan, with instructions on what they want to achieve and how.

Detailed context for the Targets, Indicators & Strategies in **Our Governance** can be found in *The State of Australia in 2020* – especially Episodes 2, 3, 4 and 7.

[Click here for The State of Australia video playlist](#)

The following Targets, Indicators and Strategies for **our governance** are derived consistent with the primary objectives of building a governance system for Australia that:

- is fit for a 21st century open democracy;
- creates equal rights for all, including First Nations;
- strengthens protections against government and corporate corruption;
- builds the nation itself along the lines of clearly articulated shared values; and
- as per the **Vision for Australia Together**:
 - ensures that our democracy is assured by a well informed and engaged community,
 - assists leaders to listen to Australians, act in our best interests, and govern for all rather than a few, and
 - assists Australia to become a responsible international citizen, active in building a safer, more peaceful and united world.

With the Targets and Strategies that are crafted here consistent with those primary objectives, the overarching intention or desired outcome is that Australia will move in the following Directions:

**In our
governance
Australia will
become:**

- A proactive participatory democracy
- A nation knowing and affirming decency
- A nation with avowed rights for all
- A free, self-governing, modern nation
- Open, transparent & accountable in its governments & institutions
- A world benchmark in leaders' conduct
- Committed to public service independence & excellence
- Protected from undue sectional influence in elections
- A nation outlawing corporate greed & encouraging private sector ethics & community partnership
- A guardian of freedom & accountability in political discourse, news media & the wider information market
- A just participant on the global stage
- A nation assured of enduring peace
- A nation leading in empathy & global cohesion

Targets and Strategies will also contribute positively to multiple other Directions in **Australia Together**, as displayed.

The index of political participation in the Scanlon Index of Social Cohesion does not fall below 100 unless Australians simultaneously perceive an improvement in the index of social justice and equity within the Scanlon Index of Social Cohesion.	Gov	2	A nation knowing and affirming decency.	Index of Social Cohesion was 103 (3 points above the baseline of 100 in 2007), up from 91 in 2013 but down from its highest of 107 in 2012.
	Gov	3	A nation with avowed rights for all.	
	Gov	4	A free, self-governing, modern nation.	
	Gov	11	A just participant on the global stage.	The index of political participation generally has an inverse relationship with the Scanlon index of social justice and equity because poorer results in social justice and equity have tended to result in heightened political participation. In 2019, the index of social justice and equity in the Scanlon Index of Social Cohesion was 93 (7 points below the baseline of 100 in 2007) and 19 points down from its highest score of 112 in 2009.
	Gov	12	A nation assured of enduring peace.	
	Gov	13	A nation leading in empathy & global cohesion.	
	Soc	2	A land with an Indigenous heart.	
	Soc	3	Inclusive, welcoming & enabling.	
	Soc	4	A place of optimal health and wellbeing.	
	Soc	6	A society of equals.	
	Soc	7	A success because of its diversity.	
	Soc	8	A success because of gender equality.	
	Soc	15	Confident of justice for all.	
Econ	3	A country where economic opportunity, growth & prosperity are equitably shared & living standards improve continuously for all.		
Participation in democracy Gov01.03.01 Voter turnout at federal elections for the House of Representatives is steadily maintained above 94%.	Gov	1	A proactive participatory democracy.	Between 2001 and 2016, voter turnout in federal elections trended in decline from 95% to 91%, the lowest recorded since the introduction of compulsory voting ahead of the 1925 federal election. 	Econ 3	A country where economic opportunity, growth & prosperity are equitably shared & living standards improve continuously for all.
	Econ 4	A nation fairly raising and sharing its wealth.
	Econ 9	Productive and prosperous through fair trade agreements.
An Australian Bill of Rights in the Constitution	Gov 3	A nation with avowed rights for all.

In 2021, Australians did not have explicitly conferred rights to:

- freedom of speech,
- peaceful assembly and protest,
- freedom of the press,
- trial in open court, or
- freedom from unlawful detention.

We had only a heavily limited right to freedom of political communication.

Some human rights were being provided in state legislation but these could and were being actively extinguished because there was nothing in Australia's Constitution which ensured that those rights could not be extinguished.

Targets, Indicators & Strategies for the success of Our Governance

Governance 12 – Peace & security

Targets, Indicators & Strategies for successful performance	In the Directions of becoming ...	Baseline data
<p>observance of the rule of law, and just participation in global forums (the UN, WTO, WHO) – are therefore the only viable means (economically and strategically) by which Australia may secure its people and borders;</p> <p>and acknowledge that, given these new geopolitical realities, Australia cannot afford an approach to foreign relations in which strategies for defence and diplomacy are set to disable strategies for security, growth in national resilience, and peace. By 2024, establish a fully open program of community engagement on the draft integrated defence, diplomacy and security strategy, and incorporate feedback on the potential of the draft strategy to achieve the primary objectives of security, national resilience, economic prosperity and peace in our region.</p>		See Note ²⁹ for further baseline analysis and reference materials.

²⁹ In 2021, Australian attitudes to foreign policy and relations were mixed. While the Australian government promoted military build-up by reliance on “drums of war” rhetoric and claims that “[everyday Australians](#)” supported getting prepared for war (rather than getting prepared to avoid it), Australians themselves in the majority rejected confrontation, as evidenced by the fact that in the [Lowy Institute Poll 2021](#), “when asked about a military conflict between China and the United States, more than half the population (57%) said ‘Australia should remain neutral’” and the [Institute commented further that](#) “Australians do not want regional competition to slide into confrontation.” In the same Lowy Institute Poll, however, 75% of respondents said that “The United States would come to Australia’s defence if Australia was under threat,” implying a degree of complacency among Australians (in relation to pro-US foreign policy and its efficacy in the event of military threats) that was at odds with what several experienced diplomats, analysts and commentators saw as a necessary shift in strategic relationships in the Oceania region, due to the rise of China. Recommended policy shifts included those of:

- experienced diplomat [Geoff Raby](#) who said, “Strategic cooperation [with China and Asia] rather than US-led strategic competition with China offers not only the most constructive means by which to protect and advance Australia’s interests in the region, it is also the most realistic in view of China’s regional weight and influence. ... Diplomacy, after all, is the only instrument realistically available to ensure Australia’s security. Australia itself can never fund the military defence of the continent, nor can Australia confidently rely on other states to protect us. In the new world order, the safest premise on which to build security policy is that we are on our own. Diplomacy therefore should not be seen as a cost but as an investment in Australia’s future security.”; and
- the Australia Institute’s [Allan Behm](#) who said, “However Australia decides to address its relationship with China, it must be seen to be acting clearly in its own interests, and not as a US franchise.”

Chapter 9 – Top Priority Targets and Strategies for the 2020s

Now that we have articulated a Vision, a road map towards it, and just how far we wish to go in the next 10 to 30 years, it is important to make sure we maximise our chances of getting there. This will require development and integration of Targets/Strategies which focus on resolving the twenty most critical issues that have been identified as those that must be solved before 2030.

ACFP's seven-part videocast series on [The State of Australia in 2020](#) sets out those top twenty issues. All episodes are available on [YouTube](#). Use the Episode Guide below to examine data relevant to each issue:

[Episode 1](#) – an introduction to the top twenty issues affecting Australia in 2020.

[Episode 2](#) – on our growing inequality, poverty, hunger and homelessness, the loss of the fair go for all, racial and religious conflict and exclusion of Aboriginal and Torres Strait Islanders.

[Episode 3](#) – on our Constitution, loss of rights and saving our democracy. This episode sets out how long-term planning can save our democracy from short-sighted political platforms.

[Episode 4 Part 1](#) – on unethical governance.

[Episode 4 Part 2](#) – on fractious international relations.

[Episode 4 Part 3](#) – on corporate irresponsibility.

[Episode 5](#) – on our declining economy and how we might save it.

[Episode 6 Part 1](#) – on the loss of biodiversity.

[Episode 6 Part 2](#) – on climate policy failure and how to fix it by global leadership.

[Episode 7](#) – on the decline of our health, education, social cohesion and our increasing unhappiness with the direction of Australia. This last episode includes an introduction to how National Integrated Planning & Reporting can be used by time-poor Australians to increase the chances of making their preferred vision of the future a reality.

Because the datapoints that have been set out in *The State of Australia in 2020* on these twenty critical issues function to pinpoint some of our biggest weaknesses as a nation in 2020, they also function as the basis for some of the most ambitious Targets in *Australia Together* and they demand the most ambitious Strategies. These Strategies will be assembled over time and monitored for their effectiveness, their ongoing relevance, and the degree to which they may or may not have been implemented, amended or ignored by governments.

As each Strategy is isolated, it will be loaded into the list below which relates the Strategy to the issues it should address and to the Target or Targets it can help us meet. This is a work in progress, not a map cast in stone. Gradually, the blanks will be filled and confidence in Strategies will increase. As resources permit, Community input will be sought as per the [Community Engagement Program for Australia Together](#).

Targets for and Strategies responding to the top twenty issues

By 2023, federal, state, territory, and local governments develop implementation plans consistent with the adopted national plan. By 2025, achieve full and productive work for all Australians.			
Establishment of an Accord on Wealth, Welfare and Wellbeing Econ04.02 By 2022, the federal government convenes a process of joint development with community delegates of a draft policy of commitment to the welfare of all Australians that is designed to protect and promote the economic and social wellbeing of all citizens by adherence to principles of: <ul style="list-style-type: none"> • equality of opportunity, • fair sharing of the burden of raising national wealth, • fair and more equitable distribution of national wealth, and • public responsibility by Australia as a community for those unable to avail themselves of the minimum provisions for a dignified life. By 2023, nation-wide community engagement on the commitment is to be completed. By 2024, a legislative and policy review is to be undertaken to give effect and security to any expressed mutual obligations. <p>globalisation and superpower shifts (China rising, the West in relative decline and instability), and that</p> <ul style="list-style-type: none"> • Australia's national security is largely dependent on economic security which in turn is dependent a positive relationship with China, and that • because Australia's defence policy is set towards aggression in the Oceania region and our diplomatic stance and policies are likewise set towards hawkishness rather than peace and global collaboration, they are undermining not improving national security and the risk of war, <p>develop a draft integrated defence, diplomacy and security strategy to ensure peace in our region based on acknowledgement of the following geopolitical realities for the 21st century:</p> <ul style="list-style-type: none"> • that Australia's traditional allies of the USA and the UK cannot and should not be relied on to come to Australia's aid in the event of a military or economic threat from an external source; • that Australia cannot expect that in the event of a global clash between superpowers (China, the USA, Russia) that Asian countries (eg., Japan and India) will side with Australia against China; 	<p>Gov 6 A world benchmark in leaders' conduct.</p>	
	<p>Gov 11 A just participant on the global stage.</p>	
	<p>Gov 13 A nation leading in empathy & global cohesion.</p>	

<i>A focus on priority Targets/Strategies of ...</i>	<i>... will assist Australia to become ...</i>	<i>... and will contribute to resolution of priority issues of ...</i>
<ul style="list-style-type: none"> that continuation of the post-WWII exclusive reliance on the USA alliance and the ANZUS Treaty now works against Australian security objectives wherever and whenever pursuit of the USA's objectives and interests undermines stability in the Oceania region; that the only feasible strategy for Australia in armed conflict is to avoid it entirely and that soft power resources – built steadily on the basis of ethical and cooperative behaviour by Australia in trade, climate change, human rights, humanitarian aid, observance of the rule of law, and just participation in global forums (the UN, WTO, WHO) – are therefore the only viable means (economically and strategically) by which Australia may secure its people and borders; <p>and acknowledge that, given these new geopolitical realities, Australia cannot afford an approach to foreign relations in which strategies for defence, and diplomacy are set to disable strategies for security, growth in national resilience, and peace.</p> <p>By 2024, establish a fully open program of community engagement on the draft integrated defence, diplomacy and security strategy, and incorporate feedback on the potential of the draft strategy to achieve the primary objectives of security, national resilience, economic prosperity and peace in our region.</p>	<p>Soc 1 A safe home.</p>	
	<p>Econ 9 Productive and prosperous through fair trade agreements.</p>	

<i>A focus on priority Targets/Strategies of ...</i>	<i>... will assist Australia to become ...</i>	<i>... and will contribute to resolution of priority issues of ...</i>
<p>Electoral funding reform – abolition of corporate and union donations and new taxpayer funding for elections Gov08.02.01</p> <p>Preparatory to Gov08.02 (and subject to review after completion of that community engagement process), legislate to:</p> <p>e) cap political donations (on a cumulative basis over two consecutive election terms) at \$10,000 for individuals;</p> <p>f) require compulsory disclosure for any donation above \$5,000 (or once a total of donations exceeds \$5,000 from a single donor within a single election term);</p> <p>g) ban outright donations from corporations, non-profits, unions and any other incorporated body – such ban to include a ban on individuals’ self-funding their own campaign or that of their party other than by the \$10,000 donation permitted under a) – in short, individuals may not buy elections; and</p> <p>h) for the federal election of 2025, for purposes of replacing the campaign funding capacity lost by c) above, establish a trial of a voucher system for funding of election campaigns run by registered candidates – such voucher system to be based on a one voucher per registered voter – value \$5 (five dollars) – to be distributed by the voter in favour of any registered party or independent candidate between 6 months and one month prior to an election.</p>	<p>Gov 8 Protected from undue sectional influence in elections.</p>	<ul style="list-style-type: none"> • Growing inequality • Loss of the fair go for all • Indigenous exclusion • An outmoded and failing Constitution • Loss of rights, open governance and transparency • Declining participation in democracy • Unethical governance • Corporate irresponsibility
	<p>Gov 1 A proactive participatory democracy.</p>	
	<p>Gov 3 A nation with avowed rights for all.</p>	
	<p>Gov 4 A free, self-governing, modern nation.</p>	
	<p>Gov 5 Open, transparent & accountable in its governments & institutions.</p>	
	<p>Gov 6 A world benchmark in leaders' conduct.</p>	
	<p>Gov 10 A guardian of freedom & accountability in political discourse, news media & the wider information market.</p>	
	<p>Soc 3 Inclusive, welcoming and enabling.</p>	
	<p>Soc 6 A society of equals.</p>	
	<p>Soc 8 A success because of gender equality.</p>	

<i>A focus on priority Targets/Strategies of ...</i>	<i>... will assist Australia to become ...</i>	<i>... and will contribute to resolution of priority issues of ...</i>
<p>Note: In relation to d), this would introduce additional taxpayer funding for election campaigns with – for the 2025 trial – approximately 17 million registered voters each receiving a \$5 voucher, adding an estimated \$85 million to the cost of the 2025 federal election. This could be partially offset by reduction of payments made now under Part XX of the Commonwealth Electoral Act 1918 (in 2021 = \$2.871 per eligible vote). Alternatively the voucher could be additional to the current Part XX payments, estimated at approximately \$48 million.</p>		

Chapter 10 – Future additions and amendments to *Australia Together*

Australia Together is a work in progress. However, it will increase in surety as it is built.

The current plan is a “starting draft” on which future drafts can be based. In preparing starting drafts, and releasing these for comment, ACFP is testing that the structure of the plan is working well to facilitate integration of Strategies and is efficient at drawing out Strategies that are consistent with the Vision and Directions.

Percent completion

As at September 2021 it is estimated that:

- approximately 60% of the starting draft of the plan has been completed;
- approximately half of the expected Targets, Indicators and baseline data has been incorporated into the plan;
- over 230 data points about the health and wellbeing of Australia at the outset of the 2020s have been embedded in the plan with another 100 or more to be incorporated in the starting draft plan by early to mid 2022;
- a structure for the plan has been established that is:
 - capable of integrating Strategies with preferred Directions and Targets to speed Australia’s progress towards the Vision of ***Australia Together***, and therefore
 - capable of freeing Australians from the restrictions of short term-party political platforms; and
- a sound basis for monitoring progress towards or away from the Targets of the plan has been established and is backed up by records of sources of data.

Readers are advised that obvious blanks in the current draft are to be filled progressively as resources permit and/or as data become available.

Anticipated future inclusions

Australia Together is structured with significant capacity for reporting and providing the community with insights into the changing health and wellbeing of Australia and its citizens. Within this structure it will be possible in future to provide sections on:

- Current political policies and whether they are consistent with the Vision and Directions for ***Australia Together***; and
- End of Term Reports which shed light on the performance of governments in relation to ***Australia Together*** in their most recent periods of office.

Checking the cohesion of the plan

The plan also has capacity to provide other helpful checking mechanisms including simple tables which show how each Direction, Target and Strategy contributes to the Vision for ***Australia Together***. This is the ultimate reconciliation of the plan – the check that ensures that things in the plan actually will help Australians move towards where they want to be by 2050. For this draft of ***Australia Together***, the initial assessment of how each Direction contributes to the Vision is provided in the following table.

Checking the Aim of <i>Australia Together</i> How do Directions contribute to the Vision?	
Vision element	Directions Contributing
We are safe	Soc 1 through to Soc 12, Soc 14 through to Soc 16 Env 1, 2, 3, 6, 7, 8, 9, 12, 13, 14, 18, 19 Econ 1, 2, 3, 4, 7, 8 Gov 1 through to Gov 13
We are reconciled with and celebrate our First Nations peoples and their cultures	Soc 1 through to Soc 7, Soc 9 through to Soc 16 Env 4, 5, 8, 9, 10, 11, 12, 15, 17, 18, 19 Econ 1, 2, 3, 4, Gov 1, 2, 3, 4, 6, 7, 11, 13
Everyone is welcome to participate positively in community life	Soc 1 through to Soc 13 Env 5, 17, 18, 19 Econ 1, 2, 3, 4, 6 Gov 1 through to Gov 10
We are inspired and able to renew our physical and spiritual wellbeing	Soc 1 through to Soc 8, Soc 10 through to Soc 13 Env 1, 2, 3, 5, 7, 8, 9, 10, 13, 17, 18, 19 Econ 1, 2, 3, 4, 9 Gov 1, 2, 3, 4, 10
We act together as a compassionate society	Soc 1 through to Soc 16 Env 1, 3, 18, 19 Econ 1, 2, 3, 7, 8 Gov 1 through to Gov 13
Equality is valued as enriching human community, cultural harmony and social progress	Soc 1 through to Soc 8, Soc 10 through to Soc 13 Env 1, 2, 3, 5, 7, 8, 9, 10, 13, 17, 18, 19 Econ 1, 2, 3, 7, 8 Gov 1, 2, 3, 4, 10
Diversity is positively appreciated as a basis for a successful society	Soc 2, 3, 5, 6, 7, 8, 13 Env 17, 18, 19 Econ 1 through to Econ 9 Gov 1 through to Gov 13
Everyone can realise their full potential in life, as individuals, members of a family and citizens through unlimited opportunities in education and employment of choice	Soc 3, 5, 6, 7, 8, 10, 11, 13 Env 5, 17, 18, 19 Econ 1 through to Econ 8 Gov 2, 10
Vital services are fully accessible	Soc 1 through to Soc 16 Env 3, 4, 6, 7, 16, 18, 19 Econ 1, 2, 3, 4, 5, 6, 8 Gov 7, 9
Scarce resources are conserved and fairly shared	Soc 2, 6, 8 Env 1, 2, 3, 4, Env 6 through to Env 19 Econ 1 through to Econ 6 Gov 2, 3, 5, 7, 8, 9, 13
National wealth is fairly shared	Soc 2 through to Soc 12, Soc 14 through to Soc 16 Env 1, 2, 3, 4, 18, 19 Econ 1 through to Econ 6 Gov 1, 2, 3, 5, 6, 7, 8, 9, 13
Our economy is sustainable and supports rewarding opportunities and continuous improvements in living standards for everyone	Soc 1 through to Soc 16 Env 1, 2, 3, 4, Env 6 through to Env 19 Econ 1 through to Econ 9 Gov 2, 3, 7, 9, 10
As a nation we have the courage to take a leading place in achieving the environmental aims of a global society	Soc 1, 4 Env 1 through to Env 19 Econ 1 through to Econ 9 Gov 1 through to Gov 13

Checking the Aim of <i>Australia Together</i> How do Directions contribute to the Vision?	
Vision element	Directions Contributing
Stewardship of ecology is affirmed as fundamental to planetary and human survival	Soc 1, 2, 4, 16 Env 1 through to Env 19 Econ 1, 7 Gov 3, 6
Strong democracy is assured by a well informed and engaged community	Soc 1, 2, 3, 5, 6, 7, 8, 15 Env 1, 5 Econ 7, 8 Gov 1 through to Gov 10
We are confident our leaders will reflect thoughtfully on our views and best interests when making decisions for our future	Soc 2, 3, 6, 7, 8, 15 Env 1, 2, 4 Econ 1 through to Econ 7 Gov 1 through to Gov 10
We take pride in Australia as a responsible international citizen, active in building a safer, more peaceful and united world	Soc 1, 6 Env 1, 2, 5, 10 Econ 1, 7, 9 Gov 1 through to Gov 13

Key word list for assistance in navigating the plan

Australia Together is organised to help Australians follow the safe paths – known here as “Directions” – to the future, and the Targets, Indicators and Strategies associated with the Directions. Currently there are 57 of these Directions. They correspond to the 57 areas of national, state and local administration, policy and services that need to be efficiently and fairly operated in order to run a modern, democratic country well.

Because it can be difficult to find a particular Target, Indicator or Strategy and its connections with various Directions, ACFP has provided a key word/phrase list for additional assistance in tracing and inquiries. This list will be routinely updated as the plan grows and changes.

When searching the plan for any content of interest, readers can simply search on any word they choose. But if they search on the following words/phrases, the plan is organised to take readers more swiftly to a landing point for their interest. From there, readers can track the connections of Targets, Indicators and Strategies to the specific Directions they relate to in the map to the future.

Key word/phrase finder for Targets, Indicators and Strategies in the Directions for Australia Together		
Key words	Housed under Direction – topic area	Plan/map location
Accord on wealth, welfare and wellbeing	National wealth generation & sharing	Econ04.02
Aged care - system performance monitoring	Aged care & disability services	Soc12.02
Aged care funding	Aged care & disability services	Soc12.04
Aged care package waiting times	Aged care & disability services	Soc12.01
Aged Care Royal Commission - Implementation of Recommendations	Aged care & disability services	Soc12.03
